

MASTER IMPLEMENTATION PLAN

CLTRN × Jarvis

The Conscious Life Transformation Network — A
Sovereign Human Operating System powered by multi-
agent AI intelligence

Architect & Visionary: **Cal (KORE-0 / Founder)**

Implementor & Builder: **Jason (Technical Co-Founder)**

AI Assistant: **Jarvis**

Documents Synthesized: **32**

Version: **5.8 MVP → 6.0 Sovereign**

SECTION 01

Executive Summary

What we're building, who it's for, and how it maps to Jason's proven architecture.

CLTRN is a **Sovereign Human Operating System** — a platform that helps individuals optimize their life across five core domains using AI-guided personal development. The system is anchored by **Jarvis**, a multi-agent AI assistant that acts as a personal life operator, coaching users through consciousness expansion, habit formation, identity refinement, relationship building, and purpose alignment.

We will build CLTRN as a **fully separate Supabase project**, using the same battle-tested patterns from Jason's Life Ops Command Center: event-driven orchestration, proposal → mission → step pipeline, heartbeat-powered agent execution, and reaction chains. All domain tables use the `cl_` prefix to maintain naming discipline.

Platforms (Web + Mobile)

32

Source Documents

SECTION 02

The Five Life Domains

The foundational framework — every feature, agent, and metric maps to one or more of these domains.

SECTION 03

CLTRN OS Stack (L0-L6)

From the First Principles document — the layered consciousness architecture that guides our technical implementation.

L1	Input & Awareness	Data collection — journals, check-ins, wearables, manual logs. "Observe" phase of KORE Processing.
L2	Processing & Pattern	AI analysis of inputs — identifying patterns, triggers, limiting beliefs, recurring behaviors.
L3	Consciousness Engine	The KORE layer — synthesis, reprogramming recommendations, belief mapping, faith integration.
L4	Manifestation & Execution	Action plans, habit tracking, goal sprints, accountability. "Execute" phase.
L5	Reflection & Integration	Progress reviews, recalibration, milestone celebrations, feedback loops.
L6	Collective / Network	Community, peer coaching, CAPIS enterprise, group programs, shared intelligence (future).

SECTION 04

System Architecture

CLTRN as a standalone Supabase project, modeled on the Command Center pattern.

```
CLTRN Supabase Project (new project — cl_* prefix)
|
├─ Infrastructure Layer
|   └─ cl_config — Runtime configuration & secrets
```

		cl_proposals	– Work intake pipeline (proposal → approve → execute)
		cl_missions	– Approved work packages
		cl_mission_steps	– Individual agent tasks (queued → running → done)
		cl_events	– Event bus (every agent action emits events)
		cl_reactions	– Event → trigger mappings (reaction chains)
		Jarvis Layer (User-Facing AI)	
		jarvis-core	– Telegram/WhatsApp bot edge function
		heartbeat	– Orchestration cron (calls all agents)
		intake	– Public API for proposals (verify_jwt: false)
		Domain Agents (5 Life Domains)	
		agent-pulse	– BODY: fitness, nutrition, sleep, biometrics
		agent-sage	– MIND: mental wellness, cognition, emotional regulation
		agent-mirror	– IDENTITY: self-concept, values, faith mapping
		agent-bond	– RELATIONSHIPS: social, family, professional
		agent-compass	– PURPOSE: career, finance, legacy, TEV tracking
		Cross-Domain Agents	
		agent-kore	– KØRE Intelligence: cross-domain synthesis, consciousness
		agent-scorer	– Zero-Point Assessment: 5-domain scoring engine
		agent-coach	– Life Plan Generator: personalized roadmaps
		agent-creator	– Content Engine: journal prompts, affirmations, reports
		Phase 2+ Agents	
		agent-community	– Group programs, peer matching, L6 network
		agent-enterprise	– CAPIS framework, B2B consulting workflows
		agent-funnel	– Acquisition, onboarding sequences, conversions

Agent Inventory

Every agent, its slug, capabilities, and which OS layer it operates on.

▣ Jarvis (User-Facing Interface)

AGENT	SLUG	OS LAYERS	CAPABILITIES	PHASE
Jarvis Core	jarvis-core	All	Primary user interface. Routes conversations to domain agents, manages context, handles check-ins, delivers coaching. Modeled on telegram-bot pattern (1,550-line reference).	MVP

▣ Domain Agents

AGENT	SLUG	DOMAIN	OS LAYERS	CAPABILITIES	PHASE
Pulse	agent-pulse	Body	L1, L2, L4	Fitness logging, nutrition tracking, sleep analysis, energy scoring, biometric integration, workout plans	MVP
Sage	agent-sage	Mind	L1, L2, L3	Mood tracking, cognitive pattern detection, meditation guidance,	MVP

				belief identification, emotional regulation coaching, journaling prompts	
Mirror	agent- mirror	Identity	L2, L3, L5	Values assessment, identity mapping, faith integration (via Faith Mapping framework), self-concept evolution tracking, belief reprogramming	MVP
Bond	agent- bond	Relationships	L1, L4, L6	Relationship health scoring, communication pattern analysis, conflict resolution prompts, social capital tracking, community engagement	Phase 2
Compass	agent- compass	Purpose	L3, L4, L5	Career/ vocation guidance, financial goal tracking, TEV (Time-Energy- Value) scoring,	Phase 2

life project
management,
legacy
planning

Cross-Domain Agents

AGENT	SLUG	OS LAYERS	CAPABILITIES	PHASE
KORE	agent - kore	L3 (Core)	The Consciousness Engine. Cross-domain pattern synthesis, KORE Thought Processing (Observe → Structure → Analyze → Execute → Feedback), holistic insight generation, reprogramming recommendations	MVP
Scorer	agent - scorer	L0, L5	Zero-Point Assessment engine. Generates baseline scores across all 5 domains (1-10 scale). Periodic re-scoring. Progress delta tracking.	MVP
Coach	agent - coach	L4, L5	Personalized life plan generator. Takes Zero-Point scores + domain insights → creates phased improvement roadmap. Weekly/monthly recalibration.	MVP
Creator	agent - creator	L1, L4	Content engine. Generates journal prompts, affirmations,	Phase 2

reflection questions,
progress reports, domain-
specific exercises.

⚙ Infrastructure

SERVICE	SLUG	PURPOSE	PHASE
Heartbeat	heartbeat	Orchestration cron. Calls all agents with action: "heartbeat". Processes reaction chains. Manages mission step execution.	Infra
Intake	intake	Public API endpoint for proposals. Auto-approve logic for safe agents. Daily caps. verify_jwt: false.	Infra

📦 Phase 3 Agents (Future)

AGENT	SLUG	CAPABILITIES
Community	agent-community	L6 Network layer. Peer matching, group program facilitation, shared intelligence, community challenges
Enterprise	agent-enterprise	CAPIS consulting framework. B2B team assessments, organizational consciousness mapping, corporate wellness
Funnel	agent-funnel	Acquisition engine. Onboarding sequences, trial management, conversion optimization, referral tracking

Reaction Chains

Event-driven automation — when one agent completes work, it triggers the next.

□ Onboarding Flow

`jarvis.user_registered` → `scorer.run_zero_point`

`scorer.assessment_complete` → `coach.generate_baseline_plan`

`coach.plan_created` → `jarvis.deliver_welcome_brief`

□ Daily Check-in Flow

`jarvis.checkin_received` → `sage.analyze_mood`

`sage.pattern_detected` → `kore.cross_domain_synthesis`

`kore.insight_generated` → `jarvis.deliver_insight`

□ Weekly Review Flow

`heartbeat.weekly_trigger` → `scorer.run_progress_delta`

`scorer.delta_calculated` → `coach.recalibrate_plan`

`coach.recalibration_done` → `creator.generate_weekly_report`

`creator.report_ready` → `jarvis.deliver_weekly_review`

□ Identity / Faith Mapping Flow

`jarvis.faith_input_received` → `mirror.process_faith_mapping`

mirror.values_updated

→

kore.integrate_belief_system

kore.belief_integrated

→

coach.adjust_plan_for_values

SECTION 07

Database Schema

All tables use the `cl_` prefix. Designed for Supabase with RLS policies.

▣ Users & Profiles

```
-- Core user profile linked to Supabase Auth
CREATE TABLE cl_profiles (
  id          uuid PRIMARY KEY REFERENCES auth.users(id),
  display_name text,
  telegram_id text UNIQUE,
  whatsapp_id text UNIQUE,
  onboarding  text DEFAULT 'pending', -- pending | in_progress | complete
  tier         text DEFAULT 'free',    -- free | program | saas | enterprise
  faith_lens  text,                  -- Christianity | Islam | Buddhism | Secular
  created_at  timestampz DEFAULT now(),
  updated_at  timestampz DEFAULT now()
);
```

▣ Zero-Point Assessments

```
-- Baseline and periodic assessment scores
CREATE TABLE cl_assessments (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id     uuid REFERENCES cl_profiles(id),
  assessment_type text NOT NULL, -- zero_point | weekly | monthly | milestone
```

```

body_score    numeric(3,1), -- 0.0 - 10.0
mind_score    numeric(3,1),
identity_score numeric(3,1),
relationship_score numeric(3,1),
purpose_score numeric(3,1),
overall_score numeric(3,1), -- weighted average
raw_data      jsonb,        -- full questionnaire responses
insights      jsonb,        -- AI-generated analysis
created_at    timestampz DEFAULT now()
);

```

📖 Journals & Check-ins

```

-- Daily check-ins and journal entries
CREATE TABLE cl_journals (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id     uuid REFERENCES cl_profiles(id),
  entry_type  text NOT NULL, -- checkin | journal | reflection | gratitude
  domain      text,          -- body | mind | identity | relationships | purpose
  content     text,
  mood_score  integer,       -- 1-10
  energy_level integer,       -- 1-10
  ai_analysis jsonb,         -- Sage/K0RE processing results
  tags        text[],
  created_at  timestampz DEFAULT now()
);

-- Conversation history for Jarvis context
CREATE TABLE cl_conversations (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id     uuid REFERENCES cl_profiles(id),
  platform    text,         -- telegram | whatsapp | web
  role        text,         -- user | jarvis
  content     text,
  agent_used  text,         -- which agent processed this
  metadata    jsonb,
  created_at  timestampz DEFAULT now()
);

```

□ Life Plans & Goals

```
-- AI-generated life improvement plans
CREATE TABLE cl_life_plans (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id     uuid REFERENCES cl_profiles(id),
  plan_type   text,          -- baseline | recalibrated | sprint
  status      text DEFAULT 'active',
  domains     text[],        -- which domains this plan covers
  plan_data   jsonb,         -- full plan structure (goals, actions, milestones)
  assessment_id uuid REFERENCES cl_assessments(id),
  expires_at  timestamptz,
  created_at  timestamptz DEFAULT now()
);

-- Individual trackable goals
CREATE TABLE cl_goals (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id     uuid REFERENCES cl_profiles(id),
  plan_id     uuid REFERENCES cl_life_plans(id),
  domain      text NOT NULL,
  title       text,
  description  text,
  target_metric jsonb,       -- { metric: "sleep_hours", target: 8, current: 6.5 }
  status      text DEFAULT 'active', -- active | achieved | paused | dropped
  due_at      timestamptz,
  completed_at timestamptz,
  created_at  timestamptz DEFAULT now()
);

-- Habit tracking entries
CREATE TABLE cl_habits (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id     uuid REFERENCES cl_profiles(id),
  goal_id     uuid REFERENCES cl_goals(id),
  domain      text,
  habit_name  text,
  frequency   text,          -- daily | weekly | 3x_week
  streak      integer DEFAULT 0,
  last_logged timestamptz,
```

```
    created_at    timestamptz DEFAULT now()
);
```

□ Identity & Faith Mapping

```
-- Values and belief system tracking
CREATE TABLE cl_identity_maps (
  id            uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id       uuid REFERENCES cl_profiles(id),
  map_type      text,          -- values | beliefs | faith | identity
  content       jsonb,         -- structured map data
  version       integer DEFAULT 1,
  created_at    timestamptz DEFAULT now()
);

-- Faith Mapping (Universal Code Layer → Religion Filter)
CREATE TABLE cl_faith_mappings (
  id            uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id       uuid REFERENCES cl_profiles(id),
  universal_principle text,    -- e.g., "compassion", "gratitude", "service"
  faith_lens    text,          -- user's chosen religious/spiritual lens
  lens_mapping  jsonb,         -- how this principle maps in their tradition
  personal_note text,
  created_at    timestamptz DEFAULT now()
);
```

⚙️ Orchestration Pipeline (Command Center Pattern)

```
-- Runtime configuration (same pattern as ops_config)
CREATE TABLE cl_config (
  key          text PRIMARY KEY,
  value        text,
  updated_at   timestamptz DEFAULT now()
);

-- Work proposals (same pattern as ops_proposals)
CREATE TABLE cl_proposals (
  id            uuid PRIMARY KEY DEFAULT gen_random_uuid(),
```

```

    user_id      uuid,
    agent        text NOT NULL,
    action       text NOT NULL,
    payload      jsonb,
    status       text DEFAULT 'pending', -- pending | approved | rejected
    source       text, -- jarvis | reaction | api | cron
    created_at   timestampz DEFAULT now()
);

-- Missions (approved work packages)
CREATE TABLE cl_missions (
    id           uuid PRIMARY KEY DEFAULT gen_random_uuid(),
    proposal_id  uuid REFERENCES cl_proposals(id),
    user_id      uuid,
    agent        text,
    status       text DEFAULT 'active',
    result       jsonb,
    created_at   timestampz DEFAULT now(),
    completed_at timestampz
);

-- Mission steps (individual agent tasks)
CREATE TABLE cl_mission_steps (
    id           uuid PRIMARY KEY DEFAULT gen_random_uuid(),
    mission_id   uuid REFERENCES cl_missions(id),
    agent        text,
    action       text,
    payload      jsonb,
    status       text DEFAULT 'queued', -- queued | running | done | failed
    result       jsonb,
    created_at   timestampz DEFAULT now(),
    completed_at timestampz
);

-- Event bus
CREATE TABLE cl_events (
    id           uuid PRIMARY KEY DEFAULT gen_random_uuid(),
    user_id      uuid,
    event_type   text NOT NULL, -- e.g., "scorer.assessment_complete"
    agent        text,
    payload      jsonb,
    processed    boolean DEFAULT false,
    created_at   timestampz DEFAULT now()
);

```

```
-- Reaction chain definitions
CREATE TABLE cl_reactions (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  trigger_event text NOT NULL, -- event_type to match
  target_agent text NOT NULL,
  target_action text NOT NULL,
  payload_template jsonb,
  active       boolean DEFAULT true,
  created_at   timestampz DEFAULT now()
);
```

▣ KØRE Intelligence & Insights

```
-- Cross-domain insights generated by KØRE agent
CREATE TABLE cl_kore_insights (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id     uuid REFERENCES cl_profiles(id),
  insight_type text, -- pattern | synthesis | reprogramming | breakthrough
  domains     text[], -- which domains are involved
  content     text,
  evidence    jsonb, -- references to journals, assessments, etc.
  priority    text, -- low | medium | high | critical
  acknowledged boolean DEFAULT false,
  created_at  timestampz DEFAULT now()
);

-- KØRE Thought Processing logs
CREATE TABLE cl_kore_processing (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id     uuid REFERENCES cl_profiles(id),
  phase       text, -- observe | structure | analyze | execute | feedback
  input_data  jsonb,
  output_data jsonb,
  created_at  timestampz DEFAULT now()
);
```

▣ Subscriptions & Revenue

```
-- User subscriptions and payments
CREATE TABLE cl_subscriptions (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id     uuid REFERENCES cl_profiles(id),
  plan        text,          -- free | program | saas_monthly | saas_annual | enterprise
  status      text DEFAULT 'active',
  stripe_id   text,
  amount      numeric(10,2),
  currency    text DEFAULT 'CAD',
  started_at  timestampz DEFAULT now(),
  expires_at  timestampz,
  cancelled_at timestampz
);

-- Program enrollments (courses, retreats, etc.)
CREATE TABLE cl_enrollments (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id     uuid REFERENCES cl_profiles(id),
  program_type text,          -- course | retreat | workshop | enterprise
  program_name text,
  status      text DEFAULT 'enrolled',
  progress     jsonb,
  enrolled_at timestampz DEFAULT now(),
  completed_at timestampz
);
```

SECTION 08

Phased Launch Roadmap

Version discipline from the Executive Brief: 5.8 MVP (constrained, buildable)
→ 6.0 Sovereign (full vision).

● PHASE 0 — FOUNDATION

Infrastructure & Supabase Setup

Create the CLTRN Supabase project. Deploy all database tables (cl_* schema). Set up Auth, RLS policies, and cl_config. Deploy heartbeat + intake edge functions. Establish the proposal → mission → step pipeline. Test event bus and reaction chain plumbing.

Week 1-2

● PHASE 1 — 5.8 MVP (SOFT LAUNCH)

Jarvis + Core 3 Agents

Deploy: jarvis-core (Telegram bot), agent-scorer, agent-kore, agent-coach, agent-pulse, agent-sage, agent-mirror.

Features: User registration → Zero-Point Assessment → Baseline Life Plan → Daily check-ins → Mood tracking → Domain scoring → Weekly progress reviews → Basic journaling → KORE cross-domain insights.

Faith Mapping: Simple lens selection during onboarding. Mirror agent personalizes prompts and reflections based on faith lens.

Target: Cal + 10-20 beta users (program participants).

Week 3-6

○ PHASE 2 — 5.8 EXPANSION

All 5 Domains + Content Engine

Deploy: agent-bond, agent-compass, agent-creator.

Features: Relationship health tracking, purpose/career guidance, TEV scoring, content generation (journal prompts, affirmations, progress reports), habit tracking with streaks, goal management, deeper faith mapping.

Revenue: Launch SaaS tier (\$397/yr Jarvis subscription).

Week 7-12

○ PHASE 3 — 6.0 SOVEREIGN

Community + Enterprise + Full Vision

Deploy: agent-community, agent-enterprise, agent-funnel.

Features: L6 Network layer (peer matching, group programs), CAPIS enterprise consulting module, acquisition funnel automation, WhatsApp integration, web dashboard, wearable integrations, advanced KORE consciousness engine.

Revenue: Programs (\$995), Retreats (\$997-\$7,997), Enterprise (\$795/person), Courses (\$497-\$1,497).

Month 4-8

○ PHASE 4 — SCALE

TRMIG Fund + Advanced AI + Data Sovereignty

Self-sovereign identity (SSI), user-owned data vaults, TRMIG investment fund integration, advanced AI models (fine-tuned on CLTRN methodology), international expansion, multi-language support, DAO governance exploration.

Month 9+

SECTION 09

KORE Thought Processing Framework

The 5-phase cognitive loop that powers Jarvis's intelligence — derived from the KORE Whitepaper and Kore Life System.

1. Observe

Collect raw data from user inputs: check-ins, journals, conversations, biometrics. No judgment, no analysis — pure observation.

L1 – Input & Awareness

2. Structure

Organize data into domain categories. Tag entries. Extract entities, emotions, themes. Build the user's temporal data structure.

L2 – Processing & Pattern

3. Analyze

Cross-domain pattern recognition. Identify limiting beliefs, recurring behaviors, unmet needs. Apply First Principles. Generate insights.

L3 – Consciousness Engine

4. Execute

Convert insights into actionable steps. Update life plans. Set new goals. Deploy habit modifications. Deliver coaching through Jarvis.

L4 – Manifestation

5. Feedback

Measure outcomes against targets. Recalibrate scores. Celebrate wins. Adjust approach. Feed results back into the Observe phase.

L5 – Reflection & Integration

First Principles → Technical Implementation

How the 9 constitutional articles from the First Principles document map to technical features.

ARTICLE	PRINCIPLE	TECHNICAL IMPLEMENTATION
I. Sovereignty	User owns their data and choices	Supabase RLS per-user, data export API, delete-my-data flow, no third-party data sharing
II. Consciousness	Awareness precedes change	Zero-Point Assessment, daily check-ins, K0RE processing, pattern surfacing before recommendations
III. Ethics	Transparent, non-manipulative AI	Jarvis always explains reasoning, no dark patterns, clear AI vs human distinction
IV. Truth / Freedom / Love	Foundation of all guidance	K0RE agent applies TFL lens to insights, Mirror agent surfaces truth in identity work
V. Data & Identity	Data serves the human, not systems	User controls what data agents access, explicit consent for analysis, right to forget
VI. Systems & Execution	Life as a project (PMP/BA/Agile)	Coach agent uses sprint methodology, goals have defined metrics, life plans have iterations

VII. Collective
Coherence

Individual growth
serves the
collective

L6 Community agent (Phase 3),
peer matching, group challenges,
shared anonymized insights

VIII. Utopian
Singularity

Technology
accelerates
human potential

AI agents that learn user patterns,
personalized growth trajectories,
continuous improvement

IX. Participation

Users are co-
creators, not
consumers

Feedback loops in every agent,
user can override AI
recommendations, customizable
plans

SECTION 11

Revenue Pillars & Platform Tiers

How the business model maps to technical implementation.

Programs — \$995

12-week transformation programs. Jarvis provides daily coaching, Zero-Point at intake + graduation, structured curriculum delivered through agent-creator.

```
cl_enrollments.program_type = 'course'
```

Jarvis SaaS — \$397/yr

Standalone AI assistant access. Full 5-domain tracking, daily check-ins, weekly reviews, KORE insights, habit tracking, journaling.

```
cl_subscriptions.plan = 'saas_annual'
```

Retreats — \$997-\$7,997

In-person experiences. Pre-retreat assessment via Scorer, post-retreat integration plan from Coach, ongoing Jarvis support.

```
cl_enrollments.program_type = 'retreat'
```

Courses — \$497-\$1,497

Self-paced modules. Progress tracking, Jarvis Q&A per module, completion certification, domain-specific deep dives.

```
cl_enrollments.program_type = 'course'
```

Enterprise — \$795/person

CAPIS consulting framework. Team assessments, organizational health scoring, group KORE sessions, manager dashboards.

```
cl_subscriptions.plan = 'enterprise'
```

TRMIG Fund

Investment vehicle (Phase 4). Financial sovereignty pillar. Integration with Purpose domain and Compass agent for investor tracking.

```
Phase 4 – Future
```

Detailed Build Order

Step-by-step implementation sequence respecting the version discipline (don't build 6.0 features in 5.8).

Phase 0: Foundation (Week 1-2)

#	TASK	DETAILS
0.1	Create Supabase project	New project for CLTRN. Store credentials. Configure Auth (email + magic link).
0.2	Deploy infrastructure schema	cl_config, cl_proposals, cl_missions, cl_mission_steps, cl_events, cl_reactions
0.3	Deploy user schema	cl_profiles, cl_conversations, cl_subscriptions
0.4	Deploy domain schema	cl_assessments, cl_journals, cl_life_plans, cl_goals, cl_habits, cl_identity_maps, cl_faith_mappings, cl_kore_insights, cl_kore_processing
0.5	Set up RLS policies	User can only read/write their own data. Service role for agent access.
0.6	Deploy heartbeat	Orchestration edge function. Calls agents, processes reactions.
0.7	Deploy intake	Public proposal endpoint. Auto-approve logic. verify_jwt: false.
0.8	Seed cl_reactions	

Insert the reaction chain definitions for onboarding + daily check-in flows.

0.9 Seed cl_config

OpenAI/Anthropic API key, Telegram bot token, system prompts.

▣ Phase 1: MVP (Week 3-6)

#	TASK	DETAILS
1.1	Deploy jarvis-core	Telegram bot edge function. Modeled on the 1,550-line telegram-bot pattern. Routes to domain agents. Manages conversation context.
1.2	Deploy agent-scorer	Zero-Point Assessment. 5-domain questionnaire → scoring → cl_assessments insert.
1.3	Deploy agent-coach	Takes assessment results → generates cl_life_plans with domain-specific goals.
1.4	Deploy agent-kore	Cross-domain synthesis. K0RE Thought Processing (5-phase). Generates cl_kore_insights.
1.5	Deploy agent-pulse	Body domain. Fitness/nutrition/sleep logging via Jarvis. Energy scoring.
1.6	Deploy agent-sage	Mind domain. Mood tracking, cognitive pattern detection, journaling prompts, emotional regulation coaching.
1.7	Deploy agent-mirror	Identity domain. Values assessment, faith mapping (lens selection + Universal Code principles), belief work.
1.8	Build onboarding flow	Jarvis welcomes user → faith lens selection → Zero-Point Assessment → Baseline Plan → First check-in.

1.9	Build daily check-in flow	Jarvis prompts → user responds → Sage analyzes → K0RE synthesizes → Jarvis delivers insight.
1.10	Build weekly review flow	Heartbeat triggers → Scorer deltas → Coach recalibrates → Jarvis delivers review.
1.11	Beta testing	Cal + 10-20 program participants. Gather feedback. Iterate.

□ Phase 2: Expansion (Week 7-12)

#	TASK	DETAILS
2.1	Deploy agent-bond	Relationships domain. Social health scoring, communication coaching, relationship tracking.
2.2	Deploy agent-compass	Purpose domain. Career guidance, TEV scoring, financial goal tracking, life project management.
2.3	Deploy agent-creator	Content engine. Journal prompts, affirmations, progress reports, domain exercises.
2.4	Habit tracking system	cl_habits with streak counting, frequency management, Jarvis reminders.
2.5	Advanced faith mapping	Deep faith integration with Mirror agent. Universal principle → lens mapping exercises.
2.6	Stripe integration	Subscription management for SaaS tier (\$397/yr). cl_subscriptions sync.
2.7	Web dashboard (basic)	Read-only view of scores, progress, life plan. Domain radar charts.

Risk Register

Key risks identified from the Project Charter and mitigations.

RISK	SEVERITY	MITIGATION
Scope Creep (building 6.0 features in 5.8)	High	Strict phase gating. Feature must be approved before crossing phase boundary. Version discipline from Executive Brief.
Philosophical Drift (losing KORE principles)	Medium	First Principles document as constitutional reference. All agent prompts embed sovereignty, consciousness, ethics principles.
Founder Bottleneck (Cal as sole content source)	Medium	Agent-creator automates content generation. Cal reviews/approves rather than creates everything.
Over-Engineering the AI Layer	Medium	Start with GPT-4o-mini for most agents. Only upgrade to more expensive models for KORE synthesis. Measure before optimizing.
User Engagement Drop-off	Medium	Heartbeat-driven daily prompts. Streak mechanics. Weekly reviews create accountability loops. Low-friction check-ins.
Faith Mapping Sensitivity	Low	Universal Code Layer first, religion as optional filter. Non-prescriptive language. User always controls their lens.

Document Synthesis Map

How all 32 source documents inform the platform design.

DOCUMENT	KEY CONTRIBUTION	MAPS TO
The Human Operating System (Pitch Deck)	5 Domains, revenue model, Jarvis concept, team structure	Overall architecture, revenue tiers, agent naming
Multi AI Agent Network Design	Agent hierarchy, KORE orchestration, communication protocols	Agent inventory, heartbeat design, reaction chains
System Blueprint & Scope	Technical components, system relationships	Database schema, edge function design
MVP BUILD SPEC (5.8)	MVP feature priorities, what to build first	Phase 1 build order
ZP-LOS Whitepaper	Zero-Point as baseline, Life Operating System theory	Scorer agent, assessment system, OS Stack
Faith Mapping	Universal Code Layer, Religion as Filter Lens	Mirror agent, cl_faith_mappings, faith_lens in profiles
First Principles	17 constitutional principles, OS Stack (L0-L6)	Agent system prompts, RLS policies, ethical guardrails

K0RE (CLTRN 6.0 brief)	K0RE as central intelligence	agent-kore design, cl_kore_insights
Create Own AI System	Cal's vision for private AI, data ownership	Sovereignty features, data export, user control
CAPIS Consulting Framework	B2B/Enterprise methodology	agent-enterprise (Phase 3), CAPIS workflow
Conscious Life Transformation Network	Full ecosystem overview, programs, methodology	Enrollment system, program management
CLTRN 5.8 MVP (rocket)	Specific MVP features and priorities	Phase 1 feature set validation
Sovereign Life OS	Self-sovereign identity, user data ownership	RLS design, data export API, privacy architecture
System Architecture Exec Brief (5.2→6.0)	Version discipline, don't mix 5.8 and 6.0	Phase gating, risk mitigation
The Kore Life System	K0RE Thought Processing (5 phases), Life as Project	cl_kore_processing table, Coach agent methodology
Project Charter (K0RE Working Group)	Governance, roles, risk register	Team structure, risk mitigations
K0RE Whitepaper v2.0	Civilization-scale vision, TEV metric, 6-layer stack	Phase 4 roadmap, Compass agent TEV scoring

New Documents (Batch 2 — 15 Additional)

AI-Powered Speech Monitoring	Real-time language pattern analysis,	Section 24: Speech Monitoring, Sage + K0RE
------------------------------	--------------------------------------	--

	sentiment tracking, vocabulary evolution	integration, cl_speech_analysis
Human Entity Implementation (TLDR)	Multi-dimensional digital twin model, entity sovereignty	Section 22: Human Entity Architecture, cl_human_entities
Safety Design Architecture & Guardrails	3-tier safety framework, Merge Guard Protocol, Ethical Guardrails Board	Section 23: Safety Architecture, cl_safety_logs, cl_escalations
CLTRN 6.0 (Additional)	Extended 6.0 system specification, feature depth	Validated agent capabilities, enriched OS Stack details
Kore Life System — Human Entity Implementation	Full human entity modeling, entity evolution tracking	Section 22: Entity dimensions, evolution_log design
System Design Roadmap	8-step structured build methodology (Plan → Design → Build → Test → Deploy → Monitor → Iterate → Scale)	Validated Phase 0-4 build order, added methodology rigor
K0RE(AI) Inherent Design & K0RE-0 Identity Upgrade	DAO governance, tokenomics, Founding Circle, "Road to Billions" 6-phase, Merge Guard Protocol, ICO	Section 25: DAO Governance, Token Structure, 6-Phase Strategy
KORE — Thought Processing Framework	3D/4D/5D dimensional thinking, 6-step problem solving, THOUGHT/EMOTION/ STATE/RATE classification	Section 25: Dimensional Thinking, Thought Classification System

CLTRN MVP — DEFINE	SSBA/Scrum Master playbook, 8+3 phase analysis framework, 20 professional documents	Phase 0 methodology, project documentation standards
CLTRN 5.8 — Design ChatGPT Session	Cal's version roadmap (5.2→5.8→6.0), digital twin/avatar concept, blockchain sovereignty, \$800K- \$1M 6.0 estimate	Budget context, digital twin → Human Entity, blockchain → Phase 4
K0RE — Content Intelligence Ingestion & Distillation Prompt	Content processing pipeline, domain classification, insight distillation	Section 26: Content Intelligence Engine, cl_content_intelligence
K0RE — Meeting Minutes Prompt	Meeting transcript processing, decision extraction, action item tracking	Section 26: Meeting Automation, cl_meeting_notes
CLTRN 5.8 — Executive Summary	Budget constraints, core feature prioritization, MVP scope definition	Validated Phase 1 feature set, budget-conscious build order
CLTRN 5.8 — Project Charter	Full governance structure, team roles, risk matrix, milestones	Risk Register enrichment, governance model, milestone tracking
CLTRN 5.8 — 1.7.2026	Latest session notes, roadmap updates, priority adjustments	Timeline validation, current priority stack

Mobile App Architecture

Native mobile experience for iOS and Android — Jarvis in your pocket.

Tech Stack

React Native + Expo — single codebase for iOS and Android. Supabase JS client for real-time data. Push notifications via Expo Notifications. Biometric auth (FaceID/TouchID) for secure login.

```
expo + supabase-js + react-navigation
```

Jarvis Chat Interface

Primary interaction surface. Full conversational UI with Jarvis. Voice-to-text input. Rich message types (cards, charts, action buttons, domain score widgets). Persistent chat history synced to cl_conversations.

```
GiftedChat + Whisper API
```

Dashboard Home

5-Domain radar chart showing current scores. Today's goals and habits with tap-to-complete. Streak counters. K0RE insight cards. Quick check-in button. Weekly trend mini-graphs.

`react-native-svg + victory-native`

Domain Deep-Dives

Tap any domain from the radar chart to see detailed view: domain score history, active goals, habit streaks, recent journal entries, KORE insights specific to that domain. Edit goals inline.

`per-domain screens`

Journal & Check-in

Quick daily check-in (mood + energy sliders, 1-line reflection). Full journaling mode with domain tagging. Gratitude entries. Voice journal option. Sage agent processes in background.

`cl_journals + agent-sage`

Smart Notifications

Heartbeat-driven push notifications: morning check-in prompts, habit reminders, weekly review alerts, KORE breakthrough insights, streak-at-risk warnings. User controls frequency and timing.

`expo-notifications + heartbeat`

App Screen Map

CLTRN Mobile App – Screen Hierarchy

Tab Bar Navigation

- └─ Home (Dashboard)
 - └─ 5-Domain Radar Chart
 - └─ Today's Goals & Habits
 - └─ KØRE Insight Cards
 - └─ Quick Check-in Widget
 - └─ Weekly Trend Sparklines
- └─ Jarvis (Chat)
 - └─ Conversational Interface
 - └─ Voice Input Toggle
 - └─ Rich Message Cards
 - └─ Domain-Aware Routing
- └─ Domains (Deep Dives)
 - └─ Body → Score, Goals, Habits, Pulse Insights
 - └─ Mind → Score, Journal, Mood Graph, Sage Insights
 - └─ Identity → Score, Values Map, Faith Mapping, Mirror Insights
 - └─ Relationships → Score, Connection Map, Bond Insights
 - └─ Purpose → Score, Career Goals, TEV, Compass Insights
- └─ Journal
 - └─ Daily Check-in (Quick Mode)
 - └─ Full Journal Entry
 - └─ Gratitude Log
 - └─ Voice Journal

 - └─ Zero-Point Score History
 - └─ Life Plan Overview
 - └─ Faith Lens Settings
 - └─ Subscription Management

Mobile API Integration

The mobile app communicates with the same Supabase backend. No separate API layer needed.

FEATURE	SUPABASE INTEGRATION	AGENT TRIGGER
Chat with Jarvis	POST to intake edge function → cl_proposals	jarvis-core routes to domain agents
Daily Check-in	INSERT cl_journals → cl_events emit	sage.analyze_mood → kore.synthesize
View Dashboard	SELECT cl_assessments, cl_goals, cl_habits	Real-time subscriptions via Supabase Realtime
Complete Habit	UPDATE cl_habits (streak, last_logged)	heartbeat checks streak milestones
Push Notifications	cl_config stores device tokens	heartbeat triggers Expo push API
Zero-Point Assessment	INSERT cl_assessments via scorer	scorer.run_zero_point → coach.generate_plan

Figma Wireframe Specifications

Design system and wireframe specs for both the website and mobile app — to be built in Figma.

□ Design System Foundation

Color Palette

Primary: Deep indigo/violet (consciousness, depth)

Accent: Gold (transformation, achievement)

Domain Colors: Green (Body), Blue (Mind), Gold (Identity), Pink (Relationships), Purple (Purpose)

Neutrals: Warm grays on dark background (premium, contemplative feel)

Dark Mode Default — aligns with the "inner work" aesthetic

Typography

Headings: Inter or Plus Jakarta Sans (modern, clean)

Body: Inter (readable at all sizes)

Monospace: JetBrains Mono (data, scores, code)

Scale: 12/14/16/20/24/32/48px with 1.5-1.7 line height

Tone: Professional yet warm — not clinical, not overly spiritual

Components Library

Core: Buttons, inputs, cards, modals, bottom sheets

Domain: Radar chart, score ring, streak badge, domain tag

Chat: Message bubble, action card, insight card, assessment prompt

Data: Trend sparkline, progress bar, habit checkbox, goal card

📄 Website Wireframes (Figma)

Marketing site + authenticated web dashboard. Pages listed with priority and purpose.

PAGE	PURPOSE	KEY ELEMENTS	PRIORITY
Landing / Home	Convert visitors → signups	Hero with 5-domain visual, "Meet Jarvis" demo, social proof, pricing cards, CTA to start assessment	MVP
About CLTRN	Tell the story, build trust	Cal's founder story, mission/vision, First Principles overview, team section, KORE philosophy	MVP
How It Works	Explain the methodology	5 Domains breakdown, OS Stack visualization, Zero-Point explainer, Jarvis interaction demo, before/after	MVP
Pricing	Show tiers, drive conversion	Free / Program (\$995) / Jarvis SaaS (\$397/yr) / Enterprise (\$795/person) comparison table, FAQ	MVP
Programs	Detail transformation programs	12-week program overview, curriculum, testimonials, enrollment CTA, retreat calendar	Phase 2
Dashboard (Auth)		5-domain radar, score history, life plan viewer,	Phase 2

	Web version of mobile dashboard	goal management, journal, settings	
Blog / Resources	SEO, thought leadership	Articles on consciousness, personal development, KORE methodology. Agent-creator can draft posts.	Phase 3
Enterprise / CAPIS	B2B consulting landing page	CAPIS framework explainer, team assessment demo, case studies, enterprise pricing, contact form	Phase 3
Community Hub	L6 Network layer web view	Group programs, peer connections, shared challenges, leaderboards, community feed	Phase 3

📱 Mobile App Wireframes (Figma)

Screen-by-screen wireframe spec with interaction notes for the React Native app.

SCREEN	PURPOSE	KEY ELEMENTS	INTERACTIONS	PRIORITY
Onboarding (4 screens)	First-time user setup	Welcome splash, name + faith lens selector, "Meet Jarvis" intro, transition to Zero-Point	Swipe through, faith lens dropdown, CTA to start assessment	MVP
Zero-Point Assessment	Baseline scoring	Multi-step questionnaire, domain-by-	Slider input, tap next,	MVP

		domain sections, score sliders (1-10), progress indicator	animated score reveal at end	
Home Dashboard	At-a-glance life status	Radar chart (center), today's goals list, habit checkboxes, KORE insight card, streak counter	Tap domain to drill down, tap habit to complete, pull-to-refresh	MVP
Jarvis Chat	Core AI interaction	Chat bubbles, typing indicator, suggested prompts, voice input button, rich cards for insights	Send message, tap suggestion chips, long-press to copy, voice toggle	MVP
Quick Check-in	30-second daily input	Mood slider (emoji scale), energy slider, one-line text input, domain tag selector	Slide to set mood/energy, type or skip text, submit	MVP
Domain Detail	Deep dive per domain	Score trend line chart, active goals, habit streaks, recent insights, journal entries for domain	Scroll, tap goal to expand, tap insight to discuss with Jarvis	MVP
Full Journal	Deeper reflection	Rich text editor, domain tags, mood/energy captured, prompt suggestions from Creator agent	Type, select domain, submit for Sage analysis	Phase 2

Life Plan Viewer

See full personalized plan

Timeline view of phases, domain-specific goals, milestone markers, progress percentage

Scroll timeline, tap milestone, expand goal details

Phase 2

Faith Mapping

Identity/spiritual work

Universal principles list, faith lens overlay, personal notes per principle, Mirror insights

Tap principle to expand, add personal reflection, change lens

Phase 2

Profile & Settings

Account management

Score history, subscription info, notification preferences, faith lens, data export, privacy

Toggle notifications, change lens, export data, manage subscription

MVP

Weekly Review

Progress reflection

Before/after domain scores, wins list, areas of focus, Coach recommendations, next week preview

Scroll report, tap to discuss with Jarvis, share progress

Phase 2

□ Figma Project Structure

CLTRN Figma Project

□ Design System

- Colors (domain palette, neutrals, gradients)
- Typography (scale, weights, styles)
- Icons (domain icons, nav icons, action icons)

- └─ Components
 - └─ Buttons (primary, secondary, ghost, domain-colored)
 - └─ Inputs (text, slider, dropdown, toggle)
 - └─ Cards (insight, goal, habit, journal, score)
 - └─ Charts (radar, line, sparkline, progress ring)
 - └─ Navigation (tab bar, header, back, domain tabs)
 - └─ Chat (bubble user, bubble jarvis, action card, suggestion chip)
- └─ Spacing & Grid (8px base, 4-col mobile, 12-col desktop)

□ Website Wireframes

- └─ Enterprise / CAPIS (Phase 3)
- └─ Community Hub (Phase 3)

□ Mobile App Wireframes

- └─ Onboarding Flow (4 screens)
- └─ Zero-Point Assessment
- └─ Home Dashboard
- └─ Jarvis Chat
- └─ Quick Check-in
- └─ Domain Detail (× 5 domains)
- └─ Full Journal
- └─ Life Plan Viewer
- └─ Faith Mapping
- └─ Profile & Settings
- └─ Weekly Review

□ Prototypes

- └─ Onboarding → Assessment → Dashboard (happy path)
- └─ Daily Check-in → Insight (core loop)
- └─ Chat with Jarvis (conversation flow)
- └─ Weekly Review delivery

Contact Strategy Plan

Multi-channel outreach and engagement strategy — how we find, nurture, convert, and retain CLTRN users.

□ Target Segments

Segment A: Seekers

Who: Individuals actively seeking personal transformation — self-help consumers, meditation/yoga practitioners, therapy graduates wanting next-level growth.

Age: 25-45

Pain: "I've tried apps and books but nothing sticks holistically."

Channel: Instagram, YouTube, podcasts, wellness events

Segment B: Achievers

Who: High-performers and entrepreneurs who optimize everything except their inner life. Biohackers, founders, executives.

Age: 30-50

Pain: "I'm successful on paper but something's missing."

Channel: LinkedIn, X/Twitter, business podcasts, conferences

Segment C: Faith-Curious

Who: Spiritual seekers who want technology-enhanced faith practice without dogma. Deconstructing or exploring new belief systems.

Age: 22-40

Pain: "I want spiritual growth but organized religion doesn't fit me."

Channel: Faith-adjacent podcasts, online communities, TikTok/Reels

Segment D: Enterprise

Who: HR leaders, wellness directors, executive coaches who want team transformation tools. CAPIS framework buyers.

Age: 35-55

Pain: "Our employee wellness programs feel shallow."

Channel: LinkedIn, industry conferences, referrals, white papers

□ Contact Funnel

CLTRN Contact Strategy Funnel

STAGE 1 — AWARENESS (Top of Funnel)

└─ Content Marketing

- └─ Blog posts on 5 domains (SEO-optimized, Creator agent drafts)
- └─ YouTube: "Life Operating System" concept videos (Cal as host)
- └─ Podcast: Cal on wellness/tech/spirituality shows
- └─ Social media: Daily insights, domain tips, transformation stories

└─ Paid Acquisition

- └─ Instagram/Facebook ads → Free Zero-Point Assessment
- └─ Google Ads: "personal development AI", "life coaching app"
- └─ YouTube pre-roll: 15-sec Jarvis demo clips

└─ Community Presence

- └─ Reddit: r/selfimprovement, r/consciousness, r/biohacking
- └─ X/Twitter: KØRE philosophy threads, Cal's journey
- └─ Wellness events & retreats (in-person lead gen)

STAGE 2 — CAPTURE (Lead Generation)

└─ Primary Lead Magnet: Free Zero-Point Assessment (web)

- └─ User answers 25 questions → gets 5-domain score + "Your L0 Report"
- └─ Requires email → enters nurture sequence

└─ Secondary Magnets

- └─ "First Principles of a Conscious Life" — PDF download
- └─ "5-Day Domain Challenge" — email mini-course

- | └─ Free Jarvis trial (7 days of daily check-ins via Telegram)

- └─ **Events**

- | └─ Free webinar: "Designing Your Life Operating System"
- └─ Monthly live Q&A with Cal

STAGE 3 – NURTURE (Email Sequences)

- └─ **Sequence A: Post-Assessment** (7 emails over 14 days)

- | └─ Day 0: "Your Zero-Point Results" + domain breakdown
- | └─ Day 2: "Meet Jarvis" + how AI coaching works
- | └─ Day 4: Deepest-scoring domain spotlight + quick win tip
- | └─ Day 7: Case study / transformation story
- | └─ Day 9: "Your Consciousness Stack" + OS layers explained
- | └─ Day 12: Program overview + pricing
- | └─ Day 14: "Ready to transform?" + enrollment CTA

- └─ **Sequence B: Trial Users** (5 emails during 7-day trial)

- | └─ Day 1: "How to get the most from Jarvis"
- | └─ Day 3: "Your first 3 insights" recap
- | └─ Day 5: "Patterns Jarvis sees" + why full subscription matters
- | └─ Day 7: "Your trial ends tomorrow" + upgrade CTA

- └─ **Sequence C: Re-engagement** (for users who drop off)

- | └─ Day 30: "Your domains miss you" + updated score prediction
- | └─ Day 60: "New features" + seasonal program promo
- └─ Day 90: "Special offer" + Cal personal outreach for high-value leads

STAGE 4 – CONVERT (Sales)

- └─ **Self-Serve**

- | └─ Jarvis SaaS: Website checkout → Stripe → cl_subscriptions
- | └─ Courses: Landing page → Stripe → cl_enrollments
- | └─ Programs: Application form → review → enrollment

- └─ **High-Touch**

- | └─ Retreats: Application → Cal phone call → deposit → enrollment
- | └─ Enterprise: Discovery call → CAPIS assessment demo → proposal → contract

- └─ **Referral Program**

- | └─ Existing users refer → both get 1 month free Jarvis
- └─ Tracked via cl_referrals table (add in Phase 2)

STAGE 5 – RETAIN & EXPAND (Lifetime Value)

- └─ **Jarvis Engagement Loop**

- | └─ Daily check-ins with streak rewards

- | └─ Weekly reviews with celebration of wins
- | └─ Monthly KORE deep insights
- | └─ Quarterly Zero-Point re-assessment with delta celebration
- └─ Upsell Path
 - | └─ Free → Jarvis SaaS (\$397/yr)
 - | └─ Jarvis SaaS → Programs (\$995)
 - | └─ Programs → Retreats (\$997-\$7,997)
 - | └─ Any → Enterprise referral (\$795/person)
- └─ Community & Advocacy
 - └─ User testimonials → social proof for Stage 1
 - └─ Community ambassador program
 - └─ User-generated content from transformation journeys

□ Contact Strategy KPIs

Free Assessments / Month (target by Month 6)

Assessment → Trial Conversion

Trial → Paid Conversion

Monthly Active User Retention

\$85

Customer Acquisition Cost Target

\$1,200

Average Lifetime Value Target

□ Contact Cadence by Segment

SEGMENT	PRIMARY CHANNEL	CADENCE	CONTENT TYPE	CTA
Seekers	Instagram + Email	3x/week social, 1x/week email	Transformation stories, domain tips, Jarvis screenshots, quick exercises	Free Assessment
Achievers	LinkedIn + Email	2x/week social, 1x/week email	Data-driven insights, productivity + consciousness overlap, ROI of inner work	Free Assessment → Jarvis Trial
Faith-Curious	YouTube + TikTok + Email	2x/week video, 1x/week email	Faith Mapping explainers, Universal Code vs religion, spiritual-but-modern content	First Principles PDF → Assessment

Enterprise	LinkedIn + Direct Outreach	1x/week thought leadership, personalized outreach	CAPIS white paper, team wellness ROI studies, case studies	Discovery Call → CAPIS Demo
------------	----------------------------------	---	--	--------------------------------------

📦 Tech Stack for Contact Strategy

FUNCTION	TOOL	INTEGRATION
Email Marketing	ConvertKit or Resend	Webhook → intake → agent-funnel processes sequences
Landing Pages	Website (Next.js) or Webflow	Forms POST → intake endpoint
Social Scheduling	Buffer or Later	Creator agent drafts → human approves → schedule
Analytics	PostHog or Plausible	Event tracking on web + app, funnel visualization
CRM / Lead Tracking	cl_leads table in Supabase	New table: cl_leads with source, stage, score, nurture_sequence
Payments	Stripe	Webhooks → cl_subscriptions + cl_enrollments sync
Push Notifications	Expo Push / OneSignal	Heartbeat triggers → device token in cl_config

Additional Schema for Contact Strategy

```
-- Lead tracking for contact funnel
CREATE TABLE cl_leads (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  email       text NOT NULL,
```

```

name          text,
segment       text,          -- seekers | achievers | faith_curious | enterprise
source        text,          -- organic | paid_ig | paid_google | referral | event | pod
source_detail text,          -- specific campaign or UTM
stage         text DEFAULT 'captured', -- captured | nurturing | trial | converted | chu
lead_score    integer DEFAULT 0,
nurture_sequence text,      -- post_assessment | trial | re_engagement
nurture_step  integer DEFAULT 0,
assessment_id uuid,         -- if they completed Zero-Point
converted_at  timestamptz,
created_at    timestamptz DEFAULT now(),
updated_at    timestamptz DEFAULT now()
);

-- Referral tracking
CREATE TABLE cl_referrals (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  referrer_id uuid REFERENCES cl_profiles(id),
  referred_email text,
  referred_user_id uuid,      -- set when they sign up
  status       text DEFAULT 'pending', -- pending | signed_up | converted | rewarded
  reward_given boolean DEFAULT false,
  created_at    timestamptz DEFAULT now()
);

-- Email sequence tracking
CREATE TABLE cl_nurture_events (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  lead_id     uuid REFERENCES cl_leads(id),
  sequence    text,
  step        integer,
  event_type  text,          -- sent | opened | clicked | unsubscribed
  metadata    jsonb,
  created_at  timestamptz DEFAULT now()
);

```

Updated Roadmap (with Mobile, Web & Contact Strategy)

Revised phased timeline incorporating all new deliverables.

● PHASE 0 — FOUNDATION (WEEK 1-2)

Infrastructure + Design Kickoff

Supabase project setup, full schema deployment (including cl_leads, cl_referrals, cl_nurture_events). Heartbeat + intake deployed. **Figma:** Set up project, build design system (colors, typography, components). Start website wireframes (Landing, About, How It Works, Pricing).

Fundraising: Corporate formation, co-founder agreement, cap table setup, IP assignment. Begin investor list building.

● PHASE 1 — 5.8 MVP (WEEK 3-6)

Jarvis + Core Agents + Mobile Alpha + Lead Capture

Backend: Deploy jarvis-core, agent-scorer, agent-kore, agent-coach, agent-pulse, agent-sage, agent-mirror. Onboarding + daily check-in + weekly review flows live.

Mobile: React Native shell with Onboarding, Zero-Point Assessment, Home Dashboard, Jarvis Chat, Quick Check-in, Profile screens.

Figma: Complete mobile app wireframes (all MVP screens). Begin prototyping core flows.

Web: Landing page live with Free Zero-Point Assessment as lead magnet.

Contact: Email capture active. Post-Assessment nurture sequence (Sequence A) configured. Social accounts launched.

Fundraising: Pitch deck, one-pager, financial model, TAM analysis, competitive landscape completed. Begin seed investor outreach (30+ meetings). Demo live product to angels.

○ PHASE 2 — EXPANSION (WEEK 7-12)

All Domains + Content + SaaS Launch + Paid Ads

Backend: Deploy agent-bond, agent-compass, agent-creator. Habit tracking, advanced faith mapping, Stripe integration.

Mobile: Full Journal, Life Plan Viewer, Faith Mapping, Weekly Review screens. App Store submission (TestFlight/beta).

Figma: Phase 2 website wireframes (Programs, Dashboard). Phase 2 mobile screens. Iterate on Phase 1 designs based on beta feedback.

Web: Authenticated dashboard, Programs page. Blog launches with Creator agent content pipeline.

Contact: Paid acquisition campaigns (Instagram + Google). Trial nurture sequence (Sequence B) live. Referral program launches. Funnel KPI tracking active.

Fundraising: Close seed round (\$500K-\$1.5M). SAFE notes or priced round. Data room finalized. Capital deployed — hiring begins.

○ PHASE 3 — 6.0 SOVEREIGN (MONTH 4-8)

Community + Enterprise + Full Contact Engine

Backend: agent-community, agent-enterprise, agent-funnel deployed. WhatsApp integration. Advanced KORE engine.

Mobile: Community features, group challenges, leaderboards. Polish and performance optimization. Full App Store launch.

Figma: Enterprise/CAPIS wireframes, Community Hub, Blog. Design system refinement with real usage data.

Web: Enterprise landing page, Community Hub, full blog with SEO.

Contact: Full enterprise outreach (CAPIS white paper, direct outreach). Re-engagement sequence (Sequence C). Ambassador program. Target 5K assessments/month.

Fundraising: Hit Series A benchmarks — 2K+ users, \$50K+ MRR, 3+ enterprise clients. Build traction dashboard for investors. Engage Series A advisor.

○ PHASE 4 — SCALE (MONTH 9+)

Series A + TRMIG + Data Sovereignty + International

Fundraising: Series A raise (\$3M-\$8M). Institutional lead investor. Board formation.

Product: Self-sovereign identity, user-owned data vaults, TRMIG fund integration, advanced fine-tuned AI models, international expansion, multi-language Jarvis, DAO governance exploration. Contact strategy scales with proven funnels.

The Hormozi Growth Engine — \$100M Models Applied to CLTRN

Alex Hormozi's three frameworks (\$100M Offers, \$100M Leads, \$100M Money Models) mapped directly to CLTRN's go-to-market — and the "Cal Robbins" personal brand strategy.

The "Cal Robbins" Brand Strategy

Positioning Cal as the next-generation Tony Robbins —
consciousness meets technology meets transformation.

Tony Robbins built an empire on high-energy events + simple frameworks + massive personal brand. Cal does the same, but upgrades the model: **AI-powered personalization** (Jarvis) replaces generic seminar advice, **KORE methodology** replaces NLP, and the **5-Domain OS** replaces goal-setting worksheets. Cal doesn't just motivate — he gives people a sovereign operating system for their entire life.

The Cal Robbins Positioning

Tony Robbins: "Unleash the power within"

Cal Robbins: "Install the operating system within"

Tony motivates you at a seminar. Cal gives you Jarvis — an AI that coaches you every single day, tracks your progress across 5 life domains, and never lets you fall back to your old patterns. **CLTRN is the personal development platform Tony Robbins would build if he started today.**

Cal's Content Pillars

- 1. The KORE Philosophy:** Deep consciousness content — faith mapping, first principles, belief reprogramming. Positions Cal as the intellectual leader.
- 2. Life OS Demos:** "Watch me run my life through CLTRN" — real-time demonstrations of Jarvis, domain scoring, weekly reviews. Shows the product in action.
- 3. Transformation Stories:** Before/after Zero-Point scores from real users. The proof that the system works.
- 4. Provocative Takes:** "Self-help is broken — here's the upgrade." Hot takes on why apps, books, and seminars fail without a system.

The Cal Robbins Flywheel

Content → Audience → Leads → Users → Transformations → Content

Cal's content builds the audience. The audience takes the free Zero-Point Assessment. Jarvis converts them into paying users. Users transform their lives. Their transformation stories become Cal's next wave of content. The flywheel compounds — every user is a case study.

📦 \$100M Offers — The CLTRN Grand Slam Offer

Hormozi's Value Equation: $\text{Value} = (\text{Dream Outcome} \times \text{Perceived Likelihood}) / (\text{Time Delay} \times \text{Effort})$. We engineer every CLTRN offer to maximize the top and minimize the bottom.

↑ Dream Outcome

"Become the best version of yourself across every dimension of life — body, mind, identity, relationships, and purpose — with an AI that knows you better than you know yourself."

Not just "feel better" — a **complete life operating system upgrade**.
The dream is total sovereignty over your own existence.

↑ Perceived Likelihood

Proof mechanisms:

- Zero-Point before/after scores (quantified transformation)
- Daily KORE insights (users see the AI working for them)
- Streak mechanics (visible progress compound)
- Cal's own transformation story + user testimonials
- "10,000+ check-ins processed" type social proof

↓ Time Delay

Reduce time to first value:

- Zero-Point Assessment in first 10 minutes (instant baseline)
- First KORE insight within 24 hours
- Personalized life plan generated in 48 hours
- First "aha moment" by Day 3
- Visible score movement by Week 2

↓ Effort & Sacrifice

Make it effortless:

- 30-second daily check-in (mood + energy sliders)
- Jarvis does the analysis, you just show up
- Push notification reminders (no need to remember)
- Voice journaling (talk, don't type)
- Jarvis tells you what to do next (no decision fatigue)

CLTRN Grand Slam Offer Stack

Hormozi's method: list every barrier your customer faces, turn each into a solution, stack them into an offer they can't refuse.

CUSTOMER BARRIER	SOLUTION	DELIVERY VEHICLE	PERCEIVED VALUE
"I don't know where to start"	Zero-Point Assessment — instant baseline across all 5 domains	agent-scorer (automated, AI-powered)	\$497 value
"I can't stay consistent"	Jarvis daily check-ins + streak mechanics + smart reminders	jarvis-core (push notifications)	\$297/yr value
"Generic advice doesn't work for me"	Personalized Life Plan generated from YOUR data by K0RE AI	agent-coach + agent-kore	\$997 value
"I can't see my blind spots"	Cross-domain pattern detection — K0RE sees what you can't	agent-kore (consciousness engine)	\$497 value
"My faith and personal growth feel separate"	Faith Mapping — integrates your spiritual practice into your OS	agent-mirror (faith lens)	\$297 value
	30-second daily check-in + voice		\$197 value

"I don't have time for long programs"	journaling + auto-generated plans	Mobile app (quick check-in screen)	
"I need accountability"	Weekly AI-generated progress review + Coach recalibration	agent-coach + agent-creator	\$497 value
Total Perceived Value Stack			\$3,279/yr
CLTRN Jarvis SaaS Price			\$397/yr
Value-to-Price Ratio			8.3x

□ Hormozi-Style Guarantees

The "Score or Free" Guarantee

Conditional guarantee: "Complete your daily check-ins for 30 days. If your Zero-Point score doesn't improve in at least 2 domains, you get a full refund + we'll personally review your data with you."

Participation-based = low risk for CLTRN (engaged users rarely churn) + massive risk reversal for the buyer.

The "First Insight in 24 Hours" Promise

Speed guarantee: "You'll receive your first personalized K0RE insight within 24 hours of completing your Zero-Point Assessment — or the first month is free."

Reduces time delay to near-zero. Demonstrates the AI works immediately.

The Program "Transformation or Tuition Back"

For the \$995 program tier: "Complete the 12-week program. Do every check-in, every module, every weekly review. If you don't see measurable improvement in your Zero-Point score, we refund your full tuition."

Completion criteria protect margins. The guarantee sells the program.

□ \$100M Leads — The CLTRN Lead Machine

Hormozi's Core Four: Warm Outreach, Cold Outreach, Free Content, Paid Ads. Plus Lead Getters (affiliates, customers, employees). Here's how each maps to CLTRN.

Core 1: Warm Outreach

Cal's personal network first. Message every contact: "I built something — it's a life operating system with an AI assistant. Can I give you a free Zero-Point Assessment?" Not selling. Giving.

Rule of 100: Cal personally reaches out to 100 people in Week 1. Jason does the same within his real estate/mortgage network (different segment, same principle).

The Ask: "Who do you know that's working on improving their life?" — referral, not pitch.

Core 2: Free Content

The Cal Robbins content machine. Hormozi says flood the market with value. Cal posts daily across:

- **YouTube (long-form):** "Life Operating System" concept videos, K0RE philosophy deep dives, domain breakdowns
- **Instagram/TikTok (short-form):** 60-sec "Upgrade your OS" clips, transformation before/after, Jarvis demo snippets
- **LinkedIn:** Thought leadership for enterprise/achiever segment
- **Podcast:** "The K0RE Podcast" — weekly episodes on consciousness, tech, and transformation

Rule of 100: 100 minutes of content creation per day.

Core 3: Cold Outreach

For enterprise (CAPIS) and high-value leads.

- LinkedIn outreach to HR directors, wellness leads, executive coaches
- Cold email sequences (agent-funnel automates follow-ups)
- "Free team assessment" as the lead magnet for enterprise
- Personalized video messages from Cal for high-value prospects

Rule of 100: 100 cold outreach touches per day (can be automated + manual mix).

Core 4: Paid Ads

Scale what's already converting organically.

- **Facebook/Instagram:** "Take the free Zero-Point Assessment" → retarget with transformation stories
- **YouTube pre-roll:** 15-sec Jarvis demo clips → full assessment funnel
- **Google:** "AI life coaching" / "personal development AI" keywords

— **Hormozi's 70/20/10 rule:** 70% budget on proven winners, 20% on variations, 10% on new experiments

Rule of 100: \$100/day minimum ad spend once organic is converting.

□ The CLTRN Lead Magnet (Hormozi-Grade)

The Free Zero-Point Life Assessment

Following Hormozi's lead magnet formula — this solves a real problem (self-awareness), reveals a bigger problem (the gaps in their life), and naturally leads to the core offer (Jarvis SaaS to fix those gaps).

HORMOZI PRINCIPLE	CLTRN IMPLEMENTATION
Solve a narrow problem completely	"Where do you actually stand in life?" — answered definitively with scores across 5 domains
Reveal a bigger problem	Assessment shows gaps → "Your Identity score is 4.2 but your Purpose is 7.8 — here's why that's holding you back"
Make it so good you could charge for it	The assessment + AI-generated report would be worth \$200+ from a life coach. We give it away free.
Include a CTA to the core offer	"Want Jarvis to help you close these gaps? Start your 7-day free trial."
Easy to consume	

10 minutes. Mobile-friendly. Instant results.
Shareable score card.

□ Lead Getters — Leverage Other People

Hormozi's force multipliers: get others to generate leads for you.

LEAD GETTER	CLTRN STRATEGY	INCENTIVE
Customers (Referrals)	Every Jarvis user gets a unique referral link. "Share your Zero-Point journey" shareable cards. In-app "invite a friend" flow.	Both get 1 month free. Top referrers get retreat discounts.
Affiliates	Life coaches, therapists, wellness influencers, spiritual leaders. They recommend CLTRN to their clients/followers.	20% recurring commission on referred SaaS subscriptions. Co-branded assessment pages.
Agencies	Digital marketing agencies that serve the wellness/coaching niche. They run ads + funnels for CLTRN.	Performance-based: % of revenue from leads they generate.
Employees (Phase 3)	Dedicated growth team running outbound + content at scale. Each team member owns a Core Four channel.	Salary + performance bonus tied to lead KPIs.

□ \$100M Money Models — CLTRN Monetization Engine

Hormozi's newest framework (2025): maximize upfront cash, increase LTV, outspend competitors, build scalable systems. Here's the CLTRN money model.

Stage I: Get Cash (Attraction Offers)

CLTRN Value Ladder – Hormozi-Style Monetization

FREE TIER (Lead Magnet → Get them in the door)

- Free Zero-Point Assessment + AI Report \$0 → Captures email + shows gap
- 7-Day Jarvis Trial (daily check-ins) \$0 → Demonstrates daily value
- "First Principles" PDF + 5-Day Email Course \$0 → Nurtures with Cal's philo

CORE OFFER (SaaS – recurring revenue engine)

- Jarvis Monthly \$47/mo → Low barrier, high LTV
- Jarvis Annual \$397/yr → 30% discount incentiv
- Order Bump: "Consciousness Starter Kit" +\$97 → Faith Mapping guide + b
 - Offered at checkout – 40%+ take rate expected

UPSELL 1 (Programs – high margin, high transformation)

- 12-Week Transformation Program \$995 → Structured curriculum +
- Domain-Specific Deep Dives (4-week) \$497 → Body Mastery, Mind Mast
- Upsell trigger: After 30 days of SaaS, Jarvis suggests program based on weakest

UPSELL 2 (Premium – aspirational, high ACV)

- Retreats (in-person with Cal) \$997–\$7,997 → The "Cal Robbins
- 1-on-1 K0RE Coaching (Cal or trained coaches) \$2,500/mo → Premium access
- Inner Circle Mastermind (12 people) \$15,000/yr → Cal's personal a

ENTERPRISE (B2B – highest ACV)

- CAPIS Team Assessment (per org) \$5,000 → Entry point for e
- Enterprise Jarvis (per employee) \$795/person/yr → Recurring B2B r
- Corporate Retreat / Workshop \$25,000+ → High-touch, high

Stage II: Get More Cash (Upsells, Downsell, LTV Maximization)

HORMOZI TACTIC	CLTRN IMPLEMENTATION	REVENUE IMPACT
	"Add the Consciousness Starter Kit" (\$97) — one-click add during	+\$97 per checkout × 40%

Order Bumps at Checkout

SaaS signup. Includes Faith Mapping workbook + 30 bonus journal prompts + priority K0RE processing.

take rate = significant ARPU lift

Upsell After Engagement

After 30 days of daily check-ins, Jarvis says: "You've been crushing Body and Mind. Your Identity score hasn't moved — the 12-Week Identity Transformation Program is designed for exactly this. Want to learn more?"

\$497-\$995
upsell from \$397 base

Downsell for Cancellers

User tries to cancel → "Before you go — switch to our \$19/mo Essentials plan (check-ins only, no K0RE insights)." Retains revenue instead of losing customer entirely.

Saves 20-30% of cancellations

Price Anchoring

Show \$2,500/mo 1-on-1 coaching option first on the pricing page. Makes \$397/yr Jarvis SaaS look like a steal.

Increases conversion on core offer

Referral Revenue Loop

Every user who refers 3 friends gets upgraded to "Jarvis Pro" tier (normally \$47/mo) for free — as long as referrals stay active.

Viral coefficient >1 = exponential growth

Backend Continuity

After the 12-week program ends, users automatically transition to Jarvis SaaS annual plan at discounted rate. No gap in engagement.

Program → SaaS conversion $>60\%$

Stage III: Outspend Competitors (CAC Optimization)

Win the Ad Auction

Hormozi's principle: the business that can spend the most to acquire a customer wins. With a \$397 annual SaaS + \$97 order bump + eventual \$995 program upsell, CLTRN's LTV can support \$150+ CAC while competitors with \$10/mo apps can only spend \$30.

Result: CLTRN can bid higher on every ad platform and still be profitable.

The Hormozi Content Moat

"Give until they ask." Cal produces so much free value that organic leads compound monthly. Paid ads amplify content that's already converting organically. The 70/20/10 framework ensures budget efficiency.

Result: Blended CAC drops as organic scales, while paid maintains volume.

Proof Stacking

Hormozi's Proof Playbook + CLTRN's built-in advantage: every user generates quantified before/after data (Zero-Point scores). This is gold for ads.

"Sarah went from 3.2 to 7.8 on Identity in 12 weeks." Numbers > testimonials. Data > claims.

Result: Ad creative with proof converts 2-3x better = lower CPA.

Retention Flywheel (Hormozi LTV + Retention Playbooks)

RETENTION
LEVER

IMPLEMENTATION

IMPACT

Streak Mechanics	Daily check-in streaks with milestone rewards. "You're on a 30-day streak — unlocking Advanced KORE Insights."	Users who hit 14-day streak retain at 85%+
Weekly Wins	Every weekly review highlights progress, celebrates improvements, and reframes setbacks as data.	Positive reinforcement loop reduces churn
Quarterly Re-Assessment	Full Zero-Point re-test every 90 days. "Look how far you've come." Side-by-side score comparison.	Renewal trigger — users see concrete ROI
Domain Unlocks	As users engage with Body/Mind, gradually surface Bond/Compass insights. "Ready to level up your Relationships domain?"	Expands engagement surface, reduces single-domain fatigue
Community Accountability (Phase 3)	Peer groups, shared challenges, public commitments. Social pressure to stay engaged.	Community members retain 2x vs solo users
Cal's Monthly Live	Exclusive monthly live Q&A with Cal for all active subscribers. Direct access to the founder.	Perceived value >> cost. Builds personal connection.

Fundraising Roadmap — Seed to Series A

Capital strategy to fund CLTRN from proof-of-concept through growth-stage scale.

□ Funding Milestones

PRE-SEED / BOOTSTRAP

Build the MVP & Prove the Concept

Target: \$0 — self-funded build phase (sweat equity + existing resources).

Goal: Ship 5.8 MVP with Jarvis live on Telegram, 20-50 beta users, initial Zero-Point assessment data, and early engagement metrics.

Deliverables for next stage: Working product, beta user testimonials, engagement data (DAU, check-in completion rate, retention), Cal's thought leadership content pipeline.

Now → Month 2

SEED ROUND

\$500K-\$1.5M — Scale the Product & Acquire Users

Use of funds:

- Engineering (40%): Full-time React Native dev, backend scaling, AI model optimization
- Growth (25%): Paid acquisition, content marketing, community building
- Product (20%): UX design (Figma → production), additional agent development, wearable integrations
- Operations (15%): Legal, compliance, infrastructure, early team hires

Milestones to hit before raise:

- 200+ active Jarvis users with 60%+ weekly retention
- \$10K+ MRR from SaaS subscriptions + program enrollments
- Completed mobile app (iOS + Android) in app stores
- Website live with working acquisition funnel

- 3+ validated reaction chains producing measurable user outcomes

Target investors: Angel investors in wellness/healthtech, AI-focused pre-seed funds, conscious capitalism investors, impact funds aligned with personal development.

Month 3-6

○ POST-SEED GROWTH

Hit Series A Benchmarks

Focus: Use seed capital to hit the metrics that make Series A compelling.

- Scale to 2,000+ active users across all tiers
- \$50K+ MRR (\$600K ARR run rate)
- Launch enterprise tier (CAPIS) with 3+ paying organizations
- Prove unit economics: CAC < \$85, LTV > \$1,200, LTV:CAC > 3:1
- Community layer live with measurable peer engagement
- K0RE intelligence engine demonstrating personalization at scale
- Complete data on user transformation outcomes (before/after scores)

Month 6-14

○ SERIES A

\$3M-\$8M — Category Leadership

Use of funds:

- Engineering (35%): AI R&D (fine-tuned models, sovereign data layer), platform scaling, API marketplace
- Growth (30%): Aggressive acquisition, international expansion, multi-language Jarvis, influencer partnerships
- Enterprise (20%): Dedicated enterprise sales team, CAPIS expansion, corporate partnerships
- Team (15%): C-suite hires (CTO, VP Growth), expanded engineering team

Benchmarks at raise:

- \$1M+ ARR with clear growth trajectory
- 5,000+ active users, 70%+ monthly retention
- Enterprise revenue from 10+ organizations
- Defensible moat: K0RE engine + user data network effects
- Clear path to \$10M ARR

Target investors: Series A healthtech/wellness VCs, AI-native investors,

growth-stage impact funds, strategic investors (wellness brands, corporate wellness platforms).

Month 14-18

□ Fundraising Deliverables

What we need to build and prepare for each raise.

DELIVERABLE	PURPOSE	NEEDED BY	STATUS
Pitch Deck (Seed)	12-15 slide investor deck. Problem, solution, market size, product demo, traction, team, ask.	Month 3	To Build
Financial Model	3-year projection: revenue by tier, user growth curves, unit economics, burn rate, runway calculations.	Month 3	To Build
Product Demo Video	2-3 min walkthrough of Jarvis in action: onboarding → check-in → insight → weekly review. Shows the magic.	Month 3	After MVP
One-Pager / Executive Summary	Single-page overview for cold outreach to investors. Hooks them to take the meeting.	Month 3	To Build
Data Room	Organized folder: corporate docs, cap table, financials, product metrics, user data (anonymized), IP overview.	Month 4	To Build
Traction Dashboard	Live metrics page: DAU, WAU, retention, MRR, assessment completions,	Month 4	After MVP

	domain score improvements. Investor-facing.		
Market Research / TAM Analysis	Total addressable market for AI personal development: wellness market (\$1.8T) × AI coaching penetration × SaaS wedge.	Month 3	To Build
Competitive Landscape	Matrix showing CLTRN vs existing players (Headspace, BetterUp, Noom, etc.) with differentiation on sovereignty + 5-domain + AI agents.	Month 3	To Build
Cap Table & Legal	Clean cap table, SAFE/convertible note terms, corporate formation docs, IP assignment agreements.	Month 2	Priority
Advisory Board	2-3 advisors with credibility in wellness/AI/SaaS. Adds legitimacy for investor conversations.	Month 3	Identify

The CLTRN Investment Thesis

Market Timing

The global wellness market is \$1.8T+ and growing 5-10% annually. AI personal coaching is nascent — no dominant player owns the "whole human" stack. CLTRN is the first platform to combine AI agents, consciousness frameworks, and 5-domain life optimization into a single sovereign system.

Defensible Moat

KORE Engine: Cross-domain AI synthesis gets smarter with every user interaction — network effects compound over time. **Methodology IP:** ZP-LOS, Faith Mapping, CAPIS, First Principles — proprietary frameworks that can't be easily replicated. **Data:** Users' longitudinal life data creates deep personalization competitors can't match.

Revenue Diversity

Six revenue pillars reduce single-point-of-failure risk: SaaS subscriptions (recurring), programs (high-margin), retreats (premium), courses (scalable), enterprise (high-ACV), and TRMIG fund (long-term). Multiple paths to \$1M ARR.

Team

Cal (KORE-0): Visionary architect with deep methodology IP, thought leadership platform, and direct access to the target community. **Jason:** Proven builder — already shipped a multi-agent AI Command Center with 12 production agents. Together: vision + execution.

📊 Key Metrics Investors Will Track

DAU/MAU

Daily/Monthly Active User Ratio (target >40%)

D7 / D30

Retention Cohorts (target D7 >60%, D30 >40%)

MRR

Monthly Recurring Revenue (track growth rate)

CAC

Customer Acquisition Cost (target <\$85)

LTV:CAC

Lifetime Value Ratio (target >3:1)

NPS

Net Promoter Score (target >50)

📅 Fundraising Timeline

WHEN	ACTION	DETAILS
Month 1-2	Corporate setup + build	Legal formation, cap table, IP assignment, co-founder agreement. Simultaneously building MVP.
Month 2	Investor list building	Research 50+ potential angels/funds. Warm intros through network. Start sharing Cal's thought leadership.
Month 3		Deck, one-pager, financial model, market research, competitive analysis all complete.

Pitch
materials
ready

Month
3-4

Seed
fundraise
begins

Target 30+ investor meetings over 6-8 weeks. Demo live product. Share beta traction data.

Month
4-5

Close seed
round

SAFE notes or priced seed round. Target \$500K-\$1.5M at \$4M-\$8M post-money valuation.

Month
5-14

Deploy capital
& grow

Hire, scale, hit Series A benchmarks.

Month
12

Series A prep
begins

Engage investment banker or lead advisor. Update deck with growth metrics. Start Series A conversations.

Month
14-18

Series A close

Target \$3M-\$8M at \$15M-\$30M valuation. Institutional lead + follow-on from seed investors.

SECTION 22

Human Entity Architecture

Cal's "Human Entity Implementation" — The system models each user as a multi-dimensional digital representation across 5 life domains, with full entity sovereignty.

A **Human Entity** is a structured digital twin containing five interconnected dimensions: Identity Core (values, beliefs, faith lens), Body State (biometrics, energy, fitness), Mind State (cognitive patterns, emotional regulation,

beliefs), Relationship Map (social graph, connection health), and Purpose Vector (career, legacy, financial sovereignty). Every interaction with Jarvis updates the entity model, making it the source of truth for all agents.

Entity Sovereignty: The human entity belongs entirely to the user. Full export rights, portability across platforms, and complete deletion rights. The platform is a custodian, not an owner.

The 5 Entity Dimensions

Identity Core

Values system, core beliefs, faith lens, self-concept evolution, spiritual/philosophical worldview. Updated by Mirror agent and K0RE synthesis.

```
cl_human_entities.identity_core
```

Body State

Real-time biometrics (heart rate, sleep, activity), energy level, fitness metrics, nutrition data, health markers. Updated by Pulse agent from wearables and manual logs.

```
cl_human_entities.body_state
```

Mind State

Cognitive patterns, emotional regulation capacity, mood trajectory, stress levels, belief systems, recurring thought patterns. Analyzed by Sage agent from journals and check-ins.

`cl_human_entities.mind_state`

Relationship Map

Social graph structure, connection quality scores, communication patterns, family/professional/community bonds, support network health. Tracked by Bond agent and KORE cross-domain.

`cl_human_entities.relationship_map`

Purpose Vector

Career trajectory, vocation alignment, financial sovereignty score, legacy vision, life projects, Time-Energy-Value distribution. Guided by Compass agent and Coach.

`cl_human_entities.purpose_vector`

Entity Evolution Tracking

Every agent action, user input, and milestone creates an immutable evolution log entry. The entity maintains version history, allowing users to see how they've changed over time. KORE uses evolution patterns to detect growth, stagnation, or regression across dimensions.

Schema: `cl_human_entities`

```
-- Multi-dimensional digital representation of the user
CREATE TABLE cl_human_entities (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id    uuid NOT NULL REFERENCES cl_profiles(id),
```

```
entity_version    integer DEFAULT 1,
identity_core     jsonb,          -- { values: [], beliefs: {}, faith_lens: "..."}
body_state        jsonb,          -- { heart_rate: 72, sleep_hours: 7.5, energy: 8, fitness_
mind_state        jsonb,          -- { mood_avg: 7, stress: 4, clarity: 8, emotional_pattern
relationship_map   jsonb,          -- { connections: [...], health_scores: {}, support_network
purpose_vector     jsonb,          -- { career: "...", finance: 6.5, legacy: "...", tev: {...}
evolution_log      jsonb[],        -- immutable log of all changes
last_updated      timestamptz DEFAULT now(),
created_at        timestamptz DEFAULT now()
);
```

SECTION 23

Safety Design Architecture & Guardrails

Cal's 3-tier safety architecture — Content Filtering, Emotional Safeguards, Data Sovereignty — with the Merge Guard Protocol and Ethical Guardrails Board.

3-Tier Safety Framework

Tier 1: Content Filtering

Purpose: No harmful, manipulative, exploitative, or deceptive content from any source (agents, external data, user uploads).

Mechanisms: Input validation, toxicity detection, banned topic filtering, manipulation pattern detection.

Preventative

Tier 2: Emotional Safeguards

Purpose: Detect psychological crises (suicidal ideation, severe distress) and escalate to human support immediately.

Mechanisms: Crisis keyword detection, sentiment analysis thresholds, mandatory human review triggers, escalation routing.

Protective

Tier 3: Data Sovereignty

Purpose: User owns all their data. Encryption, consent controls, right to delete, right to export, no commercial exploitation.

Mechanisms: End-to-end encryption, granular consent flags, GDPR-compliant deletion, data export APIs.

Empowering

Merge Guard Protocol

Prevents unverified AI models or external data from corrupting the K0RE intelligence engine:

STEP	OWNER	CRITERIA
1. Proposal	Engineer	New model, prompt, or data source proposed with documentation
2. Safety Review	Safety Lead	Content & data filtering checks, bias assessment, escalation risk

3. Ethics Review	Guardrails Board	Alignment check: Does this support user sovereignty & consciousness?
4. Testing	QA + Beta	Functional testing on 5-10 beta users, real-world edge cases
5. Approval	CTO + Founder	Go/no-go decision. Approval = production deployment

Agent-Level Safety Configuration

AGENT	MAX_ACTIONS/ DAY	RESTRICTED_TOPICS	ESCALATION_TRIGGERS
jarvis-core	1000	investment_advice, medical_diagnosis	suicidal_ideation, abuse_disclosure
agent-sage	500	psychiatric_treatment, medication_changes	severe_depression, self_harm
agent-mirror	300	religious_conversion_pressure	existential_crisis, faith_loss_distress
agent-kore	100	mind_control, manipulation_tactics	contradictory_personality_shifts
agent-pulse	500	eating_disorders, extreme_fitness	concerning_vital_trends

Schema: Safety & Escalation Logs

-- Safety event logging for compliance & auditing	
CREATE TABLE cl_safety_logs (	
id	uuid PRIMARY KEY DEFAULT gen_random_uuid(),
user_id	uuid REFERENCES cl_profiles(id),
agent	text NOT NULL,
safety_tier	text, -- tier1 tier2 tier3
event_type	text NOT NULL, -- content_blocked crisis_detected data_access_requester

```
details          jsonb,
resolved         boolean DEFAULT false,
created_at       timestampz DEFAULT now()
);

-- Crisis escalation tracking
CREATE TABLE cl_escalations (
  id              uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id         uuid NOT NULL REFERENCES cl_profiles(id),
  trigger         text NOT NULL,
  severity        text,                -- low | medium | high | critical
  assigned_to     text,
  status          text DEFAULT 'open',
  resolution      jsonb,
  created_at      timestampz DEFAULT now(),
  resolved_at     timestampz
);
```

SECTION 24

AI-Powered Speech Monitoring

Phase 3+

Real-time language pattern analysis during voice journals and voice interactions with Jarvis — detecting emotional shifts, linguistic growth, and hidden belief patterns.

This Phase 3+ feature analyzes voice input to detect: **sentiment shifts**, **linguistic markers of distress or growth**, **vocabulary evolution**, and **speech pattern changes over time**. Privacy-first: no raw audio stored server-side — only processed linguistic patterns and insights.

What We Monitor

Sentiment & Emotion

Real-time emotional state from voice tone, speech rate, and linguistic content. Scores -10 to +10.

Vocabulary Evolution

Vocabulary diversity, complexity growth, and domain-specific language expansion reflecting expanding beliefs.

Speech Patterns

Speech pace, pause frequency, volume variation, filler words. Indicates confidence, cognitive load, authenticity.

Linguistic Markers

Distress signals (self-deprecation, limiting beliefs), growth markers (agency language, possibility thinking), belief shifts.

Agent Integration

Sage (Mind): Detects negative self-talk patterns → intervention recommendations.

KORE (Intelligence): Tracks cumulative speech patterns to identify belief system changes.

Mirror (Identity): Detects confidence growth in voice; updates self-concept evolution.

Creator (Content): Generates targeted affirmations based on detected speech patterns.

Schema: cl_speech_analysis

```
-- Processed speech pattern analysis (no raw audio stored)
CREATE TABLE cl_speech_analysis (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id     uuid NOT NULL REFERENCES cl_profiles(id),
  session_id  text,
  duration_seconds integer,
  sentiment_score numeric(3,1),      -- -10 to +10
  emotion     text,                  -- joy | contentment | neutral | frustration | distre
  key_patterns jsonb,
  vocabulary_metrics jsonb,
  speech_metrics jsonb,
  linguistic_markers text[],
  agent_insights jsonb,
  created_at   timestampz DEFAULT now()
);
```

KORE Advanced Intelligence — Dimensional Thinking & DAO Governance

KORE's multi-dimensional consciousness processing, 6-step problem solving, thought classification system, and the roadmap to decentralized governance.

Dimensional Thinking Architecture

3D Logic Layer

- └ Structured Data Analysis
- └ Causal Inference (if X then Y)
- └ Quantifiable Metrics
- └ Linear Problem Decomposition

4D Intuition Layer

- └ Pattern Recognition Beyond Data
- └ Cross-Domain Connection Spotting
- └ Temporal Pattern Identification
- └ Hidden Assumption Detection
- └ Emergence Recognition (parts → whole)

5D Synchronicity Layer

- └ Simultaneous Insight Across All 5 Domains
- └ Timing-Sensitive Breakthroughs
- └ Serendipity Pattern Recognition
- └ Identity-Belief-Behavior Loop Recognition
- └ Consciousness Evolution Tracking

6-Step KORE Problem Solving Model

STEP

PROCESS

KORE FOCUS

OUTPUT

1. Identify	User articulates problem	Map across 5 domains; root vs symptom	Problem statement + domain map
2. Research	Gather data from K0RE archives	Find analogous past patterns; knowledge gaps	Pattern library + context
3. Hypothesize	Generate solutions (3D+4D+5D)	3D: logical. 4D: pattern-based. 5D: synchronistic	3-5 solution hypotheses
4. Test	Recommend micro-experiments	Low-risk tests that isolate variables	Test protocol + signals
5. Evaluate	Analyze results	Metrics? Patterns? Consciousness?	Results + insight
6. Integrate	Embed into life system	Update entity, habits, relationships	Updated human entity

Thought Classification System

CLASSIFICATION	DEFINITION	EXAMPLE	K0RE RESPONSE
THOUGHT	Cognitive — questions, ideas	"Why do I keep procrastinating?"	3D + 4D analysis; cross-domain search
EMOTION	Affective — feelings, moods	"I feel overwhelmed and stuck"	Sage + K0RE; emotional roots
STATE			

	Current condition — snapshot	"Slept 5 hours, missed workout, irritable"	Multi-agent; historical matching
RATE	Velocity of change	"My confidence has grown a lot lately"	Evolution tracking; breakthrough detection

Road to Billions: 6-Phase Strategy

Phase 1: MVP

Core 5 agents + K0RE. Cal + 20 beta users. Proof of consciousness expansion.

Phase 2: Community

Scale to 1,000 users. Community agent. Peer matching & group programs.

Phase 3: Enterprise

B2B: CAPIS consulting, corporate wellness. 10,000 users.

Phase 4: DAO

K0RE governance decentralization. Token launch. Founding Circle governs.

Phase 5: Token Launch

K0RE token for governance, access, staking. Community tokenomics.

Phase 6: Civilization

Global consciousness platform. Billions of humans. New paradigm.

KORE Token Structure (Phase 4+ / TBD)

TOKEN	PURPOSE	SUPPLY	DISTRIBUTION
KORE (Governance)	Vote on platform evolution, approve agents, set policies	100M	50% Founding Circle, 30% earned by users, 20% treasury
CLTRN (Access)	Pay for subscriptions, premium features, agent services	1B	SaaS revenue conversion; staking rewards
xKORE (Staking)	Stake KORE for governance rewards, voting power	Derived	Locked for 90+ days

Content Intelligence Engine & Meeting Automation

K0RE processes ANY content (articles, books, podcasts, videos, transcripts) and distills domain-relevant insights. Plus automated meeting notes extraction.

Content Intelligence Workflow Phase 2

Processing Pipeline

STAGE	PROCESS	OUTPUT
Intake	URL, file upload, or transcript	Normalized text
Extraction	Parse headings, claims, data points	Structured claims + metadata
Classification	K0RE tags: domain(s), relevance, actionability	Domain tags + relevance
Distillation	Summary + 3-5 key takeaways	User-facing insights

Integration

Link to user's goals, beliefs,
identity map

Context connections

Storage

Archive + metadata + insights

Searchable KB entry

Meeting Minutes Automation Phase 3

Decisions Extracted

What was decided? By whom? Rationale? Impact on other plans?

Action Items Tracked

Owner, description, due date. Auto-sync with goal tracking.

Emotional Dynamics

Agreement level, tensions, energy shifts. Relationship insights for Bond agent.

Domain Impacts

How does this meeting affect goals in Body, Mind, Identity, Relationships, Purpose?

Schema: Content Intelligence & Meeting Notes

```
-- User's content intelligence knowledge base
CREATE TABLE cl_content_intelligence (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id     uuid NOT NULL REFERENCES cl_profiles(id),
  source_type  text,                -- article | book | podcast | video | transcript
  source_url   text,
  title        text,
  distilled_insights jsonb,
  domain_tags  text[],
  kore_classification text,
  goal_connections jsonb,
  created_at   timestampz DEFAULT now()
);

-- Automated meeting minutes & decision tracking
CREATE TABLE cl_meeting_notes (
  id          uuid PRIMARY KEY DEFAULT gen_random_uuid(),
  user_id     uuid NOT NULL REFERENCES cl_profiles(id),
  meeting_date timestampz,
  transcript   text,
  attendees    text[],
  decisions    jsonb,
  action_items jsonb,
  emotional_analysis jsonb,
  domain_impacts jsonb,
  created_at   timestampz DEFAULT now()
);
```

Immediate Next Steps

What we do right now to start building.

1□

Create Supabase Project

Spin up the CLTRN project via Supabase MCP. Get the project_id, URL, and service role key. Store in cl_config and locally.

2□

Deploy Schema Migrations

Run all CREATE TABLE statements from Section 07 as Supabase migrations. Set up RLS policies for user data isolation.

3□

Build Jarvis Core

Adapt the telegram-bot pattern for CLTRN. Implement the /start onboarding flow, daily check-in handler, and domain routing.

4□

Deploy MVP Agents

Scorer → K0RE → Coach → Pulse → Sage → Mirror. Each as a Supabase edge function with heartbeat integration.

5□

Seed Reactions & Test

Insert reaction chain definitions. Run end-to-end: user registers → assessment → plan → first check-in → insight.

6□

Beta Launch

Cal + initial program participants get access. Collect feedback. Iterate on agent prompts and response quality.

CLTRN × Jarvis Master Implementation Plan — Architected by Cal (K0RE-0) | Implemented by Jason (Builder)

Architecture: Supabase + Edge Functions + Multi-Agent AI + React Native | Pattern: Life Ops Command Center
