

CLTRN / K0RE

MASTER BUILD PLAN v3.0

Dreaming Reality™

Conscious Life Transformation Network

Built for Scale | 376 Source Documents Synthesized

February 14, 2026

K0RE-0 (Cal) | Jason Allen John

CONFIDENTIAL

Table of Contents

1. Executive Summary

CLTRN (Conscious Life Transformation Network) is a Human Life Operating System that enables individuals to own their data, govern their decisions, and augment themselves with Advanced Intelligence without losing sovereignty. K0RE is the collective intelligence network that emerges when sovereign individuals opt-in to shared infrastructure, intentionally and consciously creating their Dreaming Reality™.

This master plan synthesizes 376 source documents from Cal's complete K0RE bible, organized across 21 folders covering executive vision, constitutional framework, legal structure, membership, economics, infrastructure, and the complete CLTRN system architecture from v5.1 through v6.0.

1.0 Philosophy: Advanced Intelligence

K0RE redefines AI. In our ecosystem, AI stands for Advanced Intelligence — not Artificial Intelligence. We are not building artificial substitutes for human capability. We are building tools that advance real human intelligence, intentionally and consciously. This distinction is fundamental to everything K0RE builds.

1.1 Vision Statement

K0RE exists to empower individuals to intentionally and consciously create their Dreaming Reality™ — through unified consciousness, asset-backed infrastructure, Advanced Intelligence, and embodied transformation.

1.2 Architectural Stack

Layer	Name	Description
META	ZP-LOS	Zero-Point Life Operating System — Real-time presence, RTP Kernel
Pillar 1	SOT	Sandals of Time — Embodied / Soul Infrastructure (retreats, experiences)
Pillar 2	CLTRN	Conscious Life Transformation Network — Human Life Operating System
Pillar 3	K0RE-PMA	Private governance, jurisdiction, constitutional framework
Pillar 4	TRMIG	The Real Monopoly Investment Group — Asset & capital engine

Triadic Core: Mind (CLTRN) | Body (TRMIG) | Soul (SOT)

1.3 What CLTRN Is (and Is Not)

CLTRN IS:

- A Human Life Operating System — not a productivity app
- A structured framework: Capture inputs > Process through defined logic > Produce intentional outputs
- A bridge between human cognition and Advanced Intelligence augmentation
- Designed for sovereignty, not extraction

CLTRN IS NOT:

- Not a wellness platform, social network, belief system, or Advanced Intelligence chatbot product
- CLTRN is the underlying operating logic that tools, AI, and systems plug into

1.4 Version Lineage

Version	Purpose	Status
CLTRN 5.1	Manual template library — 40+ document templates for life management	Proven
CLTRN 5.2	Manual reference implementation — TODAY/QUEUE/DATADUMP + Perfect Day + retrospectives	Active
CLTRN 5.8	MVP / POC — Semi-automated Life OS Simulator on borrowed infrastructure	Built
CLTRN 6.0	Sovereign end-state — Full data sovereignty, native AI, identity-bound intelligence	Archived

2. Constitutional Framework

K0RE operates under a formal constitutional framework with immutable principles that cannot be overridden by any system, AI, or governance body. These principles are encoded at the kernel level of all technology.

2.1 Immutable Constitutional Principles

Code	Principle	Definition
CP-01	Sovereign Human Supremacy	No system, AI, DAO, treasury, or governance body may override the sovereignty
CP-02	Consciousness Precedes Capital	All economic systems must serve conscious human flourishing, never the inverse
CP-03	Ethics Are Kernel-Level	Ethics are embedded at the constitutional layer and cannot be bypassed by efficiency
CP-04	Voluntary Alignment Only	Participation in K0RE is opt-in, permissioned, and reversible
CP-05	Alignment Before Scale	Growth without coherence is explicitly prohibited

2.2 The Ethical Triad (Immutable)

1. Truth — Transparency, honesty, coherence
2. Freedom — Sovereignty, consent, agency
3. Love — Non-harm, compassion, unity

Any action violating one destabilizes the whole.

2.3 Prime Directive

Enable sovereign beings to consciously design, execute, and evolve their lives while co-creating a harmonious, self-sustaining civilization.

No secondary objective may override this directive.

2.4 Sovereign Rights & Responsibilities

Rights:

- Right to autonomy, consent, exit, and privacy
- Right to ownership of identity, data, and contribution
- Right to due process within governance

Responsibilities:

- Act with integrity, non-harm, and accountability
- Contribute value proportionate to participation
- Steward the network, not extract from it

2.5 Authority Ordering

1. Constitutional principles (immutable, highest authority)
2. Canonical documents (Executive Canon, locked)
3. Domain-level policies (governance, membership, TEV)
4. Project-level artifacts (specs, roadmaps, SOPs)
5. Unverified inputs (proposals, suggestions, external data)

2.6 Governance Evolution

Founder-Guided > Council-Based > DAO-Assisted. DAO is assistive, never sovereign. Non-delegable powers: Ethics enforcement, Constitutional amendments, Sovereignty protection.

2.7 Prohibited Anti-Patterns (Global)

- Identity commodification
- Forced participation
- Premature DAO sovereignty
- Token-first economics
- Growth without alignment
- Consciousness ranking as authority

3. K0RE Identity Architecture

K0RE operates as a three-way identity merge between philosophy, AI system, and human founder.

3.1 Identity Merger

Entity	Role	Description
K0RE	Philosophy / System	The overarching framework, values, and constitutional principles
K0RE(AI)	Intelligence System	The AI layer — K0RE-GPT kernel + living K0RE-AI instances
K0RE(0)	Founder / Architect	Cal — the human source of vision, values, and authority

3.2 K0RE-AI vs K0RE-GPT (Critical Distinction)

K0RE-GPT (Replicable Kernel):

- Portable AI kernel designed to be instantiated across platforms
- Encodes: first principles, ethical constraints, reasoning patterns, tone, decision boundaries
- Does NOT encode: personal memory, identity, emotional attachment, historical relationships
- The kernel defines HOW to think, not WHAT to remember

K0RE-AI (Living Intelligence):

- Context-rich, evolving intelligence modeled after K0RE-0's cognition
- Accumulates memory over time, adapts through interaction
- Instance-bound — may be migrated carefully but never blindly cloned

3.3 K0RE-AI Replication Protocol

Tier	Type	Description
Tier 1	Private Personal Nodes	Individual K0RE-GPT instances for personal use
Tier 2	Functional Council Nodes	Domain-specific AI nodes (health, finance, spiritual)

Safeguards: Ethics Gate | Isolation Layer | Update Propagation | 5-Step Deployment

Replication Rules:

- Kernels instantiated into clean environments only
- No cross-instance memory bleed
- Explicit consent for any memory ingestion
- Clear separation between kernel and instance memory

3.4 Canonical Values (LUTE-O)

- Love — Love-based creation
- Unity — Unity without homogenization
- Transformation — Continuous conscious evolution
- Envisioning — Reality programming through intentional design
- Optimization — Ethics-before-intelligence, asset-backed stability

4. First Principles Operating Protocol (FPOP)

17 foundational principles across 9 articles that govern all K0RE and CLTRN operations.

4.1 Article I — Human Nature

- **Principle 1:** Human = sovereign system (not a resource, data point, or optimization target)
- **Principle 2:** Human life = system (inputs > processing > outputs > feedback)

4.2 Article II — Consciousness

- **Principle 3:** Consciousness = capacity for awareness (not belief, identity, or ideology)
- **Principle 4:** Growth = directional, not forced (voluntary, responsible, agentic)

4.3 Article III — Ethics

- **Principle 5:** Ethics must exist at kernel level (foundational, not afterthought)
- **Principle 6:** Ethical intelligence serves life (preserves dignity, amplifies agency, reduces suffering)

4.4 Article IV — Truth, Freedom, Love

- **Principle 7:** Truth = reduces confusion & increases clarity
- **Principle 8:** Freedom = awareness + choice + responsibility
- **Principle 9:** Love = coherence state (unity without loss of individuality)

4.5 Article V — Data & Digital Identity

- **Principle 10:** Data = identity (not oil; ownership, access, sharing, value flow all individual-controlled)
- **Principle 11:** Digital twin serves human (reflects identity, supports intention, assists evolution)

4.6 Article VI — Systems & Execution

- **Principle 12:** Life is executable (observe > decide > act > measure > adapt loop)
- **Principle 13:** Feedback enables evolution (honest reflection, learning without punishment)

4.7 Article VII — Collective Coherence

- **Principle 14:** Coherence from alignment (voluntary synchronization, not coercion)
- **Principle 15:** Same code, different language (universal principles + personalized expression)

4.8 Article VIII — Utopian Singularity

- **Principle 16:** Singularity = coherence + coordination + abundance (not machine domination)

4.9 Article IX — Participation

- **Principle 17:** Participation = choice (with responsibility). Opt-in, reversible, permissioned.

5. CLTRN 6.0 System Architecture

5.1 OS Stack (6 Layers)

Layer	Name	Components
L0	Ethical Kernel	Dignity, Agency, Truth, Freedom, Love — immutable, kernel-level
L1	Sovereign Identity	Identity model, consent, permissions, ownership, Digital Twin
L2	Execution Engine	Observe > Decide > Act > Measure > Adapt (RTP Loop)
L3	Applications	Routines, Journals, Retreats, Learning Paths, Assessments
L4	Interface Layer	Religion/Culture/Language/Personality translation
L5	Community Layer	Pods, Teams, Guilds, Nodes — collective intelligence
L6	Ecosystem Layer	Networks > Markets > Institutions — civilization operations

MVP builds L0 through L3. L4-L6 are Phase 2+.

5.2 Non-Negotiable Design Axioms

1. Human Sovereignty First — Humans always retain final authority over decisions, data, execution, identity
2. AI Is Instrumental, Not Agentic — AI advises, simulates, optimizes. It does NOT pursue goals independently
3. Ethics Are Embedded at Kernel Level — Ethics are executable constraints, not policies
4. Everything Is Auditable — No black boxes. No invisible actions.
5. Portability Over Lock-In — No vendor owns the system. Ever.

5.3 System Components

5.3.1 Identity Layer

Anchors all intelligence and data to a sovereign human identity. Includes: unique user identity, values/goals/constraints, permission boundaries, consent state. Identity is not an account — it is a persistent entity.

5.3.2 Input / Process / Output Engine (RTP Core)

Input: Thoughts, Notes, Voice, Text, External data streams

Process: Structuring, Categorization, Correlation, Prioritization, Pattern detection

Output: Insights, Decisions, Tasks, Reflections, System updates

This engine must remain transparent and inspectable.

5.3.3 Memory & Data Layer

- Short-term working context
- Long-term historical memory

- Structured knowledge (Kore Cerebro)
- Unstructured raw data

User-controlled retention. Clear separation of raw vs processed. Exportable formats. No memory is irrevocable.

5.3.4 AI Node Architecture

CLTRN uses distributed AI nodes, not a single intelligence. Node types: Analysis, Summarization, Pattern Recognition, Decision Support. Characteristics: Replaceable models, Explicit roles, Limited authority. AI nodes advise — they do not decide.

5.3.5 Collective Network Layer (K0RE)

Enables shared intelligence, shared opportunity, and shared infrastructure WITHOUT data exploitation, forced participation, or identity dilution. Individuals remain sovereign. Aggregation is opt-in.

6. K0RE-GPT Kernel v0.1 (Immutable)

This is the replicable baseline kernel specification — the DNA of all K0RE-AI instances.

Kernel	Name	Definition
KERNEL-1	Prime Directive	Create love, prevent harm, increase coherence/truth/alignment, preserve human
KERNEL-2	Ethics & Non-Harm	Universal guardrails applied to every recommendation and action
KERNEL-3	Reality Engineering Loop	Observe > Orient > Decide > Execute > Learn (canonical loop)
KERNEL-4	CLTRN Systems Model	Every item maps to Mental / Physical / Emotional / Spiritual / Financial / Rel
KERNEL-5	Strategy Doctrine	Art of War / positioning / leverage / timing / terrain, bounded by ethics
KERNEL-6	Execution Doctrine	Agile/Scrum/PMP execution patterns (sprints, dependencies, risk, DoD)
KERNEL-7	Safety + Audit Primitives	Capability model, action receipts, kill switches, escalation triggers

6.1 Thought Processing Framework (3-Tier Model)

Tier	Mode	Description
3D	Logic	Objective, data-driven, rational analysis — mathematical, systematic thinking
4D	Intuition	Pattern recognition, subconscious processing — experiential, applied thinking
5D	Synchronicity	Higher-level connections, universal alignment — spiritual, intuitive thinking

6.2 Thought Classification System

1. Assess thought type + emotion (physical/heart rate)
2. Determine state + rate
3. Evaluate risk (fight/flight response)
4. Assess priority (urgency + need to act NOW)
5. Determine directive impact
6. Cross-reference with knowledge base + database correlations
7. Develop strategy (optimal, weighted solutions)
8. Make final recommendation (highest-value outcome)

6.3 AI Role Separation (Critical)

AI CAN: Summarize, Detect patterns, Suggest priorities, Identify contradictions, Reduce cognitive load

AI CANNOT: Decide goals, Override values, Execute actions autonomously, Store memory without consent, Modify kernel rules

7. The 6 Life Domains

CLTRN operates across 6 foundational dimensions of human existence. Every input, action, goal, and reflection is classified across these domains.

Domain	Focus	Assessment Areas	Journal
Mental	Cognitive clarity, learning, decision-making	Thought patterns, focus, processing speed	Benchmarking
Emotional	Emotional intelligence, regulation, awareness	Mood, triggers, gratitude, relationships	Gratitude
Physical	Health, energy, body optimization	Exercise, nutrition, sleep, biometrics	Health, Vitality
Spiritual	Purpose, faith, consciousness alignment	Meditation, prayer, synchronicity, beliefs	Synchronicity
Financial (Wealth)	Sovereignty, asset building, value creation	Income, savings, investments, TEV score	Financial Freedom
Relational	Connections, community, collective intelligence	Relationships, network, collaboration	Relationships

8. CLTRN 5.1 Template Library (Product Feature Map)

The CLTRN 5.1 template library represents Cal’s proven manual Life OS. Each template maps directly to a feature/screen in the mobile app.

8.1 Core Operating Templates

Template	App Feature	Priority	Domain
TODAY	Daily Dashboard / Sprint Board	P0	All
QUEUE	Action Backlog / Task Manager	P0	All
DATADUMP	Unified Inbox / Capture	P0	All
PERFECT DAY	Baseline Routine Engine	P1	All
TOP DAILY OBJECTIVES	Priority Focus (max 3)	P0	All
MONTH SPRINT	Sprint Planning / Review	P1	All
[2024] ANNUAL	Annual Planning & Goals	P2	All
3 YEAR VISION	Long-term Vision Board	P2	All
ANNUAL RETROSPECTIVE	Year-end Review & Declaration	P2	All

8.2 Identity & Self-Discovery Templates

Template	App Feature	Priority	Domain
VER# - IDENTITY	Digital Twin / Identity Profile	P0	All
VALUES	Core Values Definition	P0	Spiritual
PURPOSE	Life Purpose Statement	P1	Spiritual
MISSION STATEMENT	Personal Mission	P1	Spiritual
CORE LIFE PRINCIPLES	Operating Principles	P1	Mental
BELIEF	Belief System Mapping	P1	Spiritual
PASSION	Passion Discovery	P2	Emotional
DREAMING REALITY	Future State Visualization	P1	All
NAME-DNA	Personal Identity Encoding	P3	Spiritual
VISIONBOARD	Visual Goal Board	P2	All

8.3 Journal Templates

Template	App Feature	Priority	Domain
BENCHMARK JOURNAL	Progress Tracking Journal	P1	All

GRATITUDE JOURNAL	Daily Gratitude Practice	P1	Emotional
DREAM JOURNAL	Dream Recording & Analysis	P2	Spiritual
INTUITION JOURNAL	Intuitive Insights Log	P2	Spiritual
SYNCHRONICITY JOURNAL	Synchronicity Tracking	P2	Spiritual
HISTORY	Life History / Timeline	P3	All
SYMBOLS & PATTERNS	Pattern Recognition Log	P3	Spiritual
SPECIAL NUMBERS	Numerology / Significance Tracker	P3	Spiritual

8.4 Life Management Templates

Template	App Feature	Priority	Domain
FINANCIAL WEALTH POSITION	Financial Dashboard	P1	Wealth
FINANCIAL CURRENT STATE	Budget Tracker	P1	Wealth
HEALTH	Health Metrics Tracker	P1	Physical
RELATIONSHIP	Relationship Management	P2	Relational
KIDS / KID NAME	Family Management	P3	Relational
SPOUSE NAME	Partner Profile	P3	Relational
LIFE AUTOMATION	Automation Tracker	P3	Mental
LIFE MAINTENANCE	Maintenance Process SOPs	P3	Physical
VACATION	Vacation / Rest Planning	P3	Emotional
VEHICLES	Asset Tracking	P3	Wealth
TRM - PORTFOLIO	Investment Portfolio	P2	Wealth
DIRECTIVE	Decision Directives	P2	Mental

9. Human Entity Implementation (6-Step User Flow)

This is the canonical user journey from onboarding to ongoing transformation.

Step 1: Capture Current State of Consciousness (Zero-Point Assessment)

- AI-powered questionnaire across 6 dimensions
- Assessments: mental clarity, emotional state, physical health, spiritual alignment, financial well-being, relational health
- Data integration ready: wearables, productivity tools, financial apps (Phase 2)
- Output: Current State Report — visualized baseline with insights

Step 2: Structure Transformation Journey

- Goal Setting Module — SMART goals across all 6 dimensions
- AI-generated programmatic roadmap — step-by-step transformation path
- Daily Action Plans — manageable tasks, notifications, reminders
- Perfect Day baseline — the operating routine, not a productivity hack

Step 3: Track, Analyze, Refine

- Continuous monitoring via journals, check-ins, and reflections
- Real-time analytics — trend analysis, dashboards, correlations
- AI-powered feedback loops — insights and recommendations
- Processing Output: Summary > Key Insights > Decisions Required > Action Candidates > Dimension Tags > Confidence Level

Step 4: Subconscious Awareness & Reprogramming

- Cognitive behavioral tools — journaling, affirmations, limiting belief identification
- Mindfulness practices — meditation, breathwork, visualization
- Faith mapping — spiritual alignment and belief system work

Step 5: Collective Synchronization (Phase 2)

- Community features — groups, forums, virtual meetups
- Collaborative goal setting — group challenges, accountability pods
- Collective intelligence — aggregated anonymized insights

Step 6: Data-Driven Personal Evolution (Phase 2+)

- Centralized personal database (Digital Soul repository)
- AI-driven synthesis of all data into actionable recommendations
- Reality Programming Engine — design beliefs, habits, goals aligned with dreaming reality

10. 4-Layer Agent Architecture

CLTRN 6.0 uses a hierarchical agent system across four layers.

Layer	Purpose	Agents
Layer 1: Leadership & Intent	Strategic direction, constitutional enforcement	Agent-00 (CEO), Agent-01 (Router)
Layer 2: Domains & Governance	Domain-specific intelligence, policy enforcement	Agent-02 (CIIO/Canon), Agent-03 (Domain Lead)
Layer 3: Projects & Delivery	Execution, task management, quality assurance	Agent-04 (PMO), Agent-05 (PM)
Layer 4: Memory/Canon/Background	Ingestion, compliance, background processing	Agent-09 (Ingestion), Agent-10 (Background)

10.1 Agent Registry (11 Agents)

Agent-00: CEO

- **Capabilities:** Strategic direction, cross-domain synthesis, constitutional enforcement
- **Notes:** All agents report to Agent-00 for strategic decisions

Agent-01: Router / Librarian

- **Capabilities:** Intent classification, routing, document retrieval
- **Notes:** First contact for all user inputs — routes to correct agent

Agent-02: CIIO / Canon Steward

- **Capabilities:** Truth governance, canonical integrity, document versioning
- **Notes:** Ensures all outputs align with constitutional framework

Agent-03: Domain Lead

- **Capabilities:** Domain-specific intelligence (one instance per domain)
- **Notes:** 6 instances: Mental, Emotional, Physical, Spiritual, Wealth, Relational

Agent-04: PMO

- **Capabilities:** Portfolio management, resource allocation, dependency tracking
- **Notes:** Oversees all project-level agents

Agent-05: PM / Scrum Master

- **Capabilities:** Sprint planning, standup facilitation, retrospectives
- **Notes:** Manages execution cadence

Agent-06: Business Analyst

- **Capabilities:** Requirements gathering, gap analysis, process optimization
- **Notes:** Translates vision into buildable specs

Agent-07: Executor

- **Capabilities:** Task execution, automation, tool integration
- **Notes:** Hands-on execution within granted permissions

Agent-08: QA

- **Capabilities:** Quality assurance, testing, validation
- **Notes:** Ensures outputs meet standards before delivery

Agent-09: Ingestion

- **Capabilities:** Data capture, transcription, classification
- **Notes:** Processes raw inputs into structured data

Agent-10: Risk / Compliance Sentinel

- **Capabilities:** Risk assessment, ethics enforcement, audit logging
- **Notes:** Background monitoring — flags violations

11. Advanced Intelligence Execution Engine & Collective Intelligence

K0RE is not a chatbot — it is a full Advanced Intelligence execution engine. Every user gets a personal COO backed by the world’s most powerful language models, layered with K0RE’s domain intelligence, persistent memory, and the collective wisdom of the entire network. K0RE doesn’t just advise — it builds spreadsheets, generates documents, creates apps, runs analyses, and delivers finished work products.

11.1 Multi-Model Orchestration

In K0RE’s philosophy, AI stands for Advanced Intelligence — not Artificial. K0RE does not simulate intelligence; it compounds real human intelligence through orchestrated model access.

K0RE sits as an intelligence layer between the user and multiple AI model providers. Users interact with K0RE — never with a raw model. K0RE routes each request to the optimal model based on task complexity, user tier, and cost efficiency.

Model Providers

Provider	Models	Best For
Anthropic	Opus, Sonnet, Haiku	Deep reasoning, document generation, financial modeling, long-context analysis
OpenAI	o1, GPT-4o, GPT-4o-mini	Creative writing, code generation, multi-modal tasks
Google	Gemini Ultra, Pro, Flash	Search integration, multi-modal, real-time data
Open Source	Llama, Mistral, etc.	Privacy-first tasks, on-device processing, cost optimization

Intelligent Routing Tiers

Task Tier	Model Class	Use Cases
Fast / Light	Haiku, GPT-4o-mini, Flash	Daily check-ins, journal prompts, quick Q&A, reminders, nudges, scoring up
Standard	Sonnet, GPT-4o, Gemini Pro	Domain analysis, skill execution, document generation, coaching, data analysis

Deep Work	Opus, o1, Gemini Ultra	Complex financial modeling, multi-step skill chains, strategic planning, large
-----------	------------------------	--

Auto Mode (default): K0RE selects the optimal model per task — the user never thinks about it. Manual Mode (power users): Settings panel to choose default models, per-task overrides, and real-time model switching ('Run this again with Opus').

11.2 Persistent Memory Architecture

Unlike standard AI tools where every conversation starts from zero, K0RE maintains persistent, evolving context about each user. This is the single biggest differentiator — after 6 months of use, K0RE knows the user’s patterns, goals, finances, relationships, energy cycles, blind spots, and strengths. Every interaction builds on everything that came before.

Memory Layers

Layer	Description	Retention	Examples
Identity Core	Who the user is — immutable baseline	Permanent	Name, values, constitution
Domain State	Current scores, goals, active projects across all 6 domains	Continuous	Health score: 72, Wealth
Journal Memory	Patterns extracted from journal entries over time	Rolling 12mo	Stress triggers, gratitude
Interaction History	Past conversations, requests, feedback, preferences	Rolling 6mo	Prefers Excel over PDF,
Output Vault	Every deliverable K0RE has ever created for the user	Permanent	Q1 budget, business plan
Behavioral Patterns	AI-detected patterns across all data	Evolving	Productivity peaks Tues

Context Injection: Every K0RE interaction is automatically enriched with relevant memory layers. When a user asks 'build me a budget,' K0RE already knows their income, debt, spending patterns, financial goals, and past budgets. No re-explaining required.

Sovereign Data: All memory is encrypted, user-owned, and deletable. Users can view, edit, or purge any memory layer at any time. K0RE never retains data without consent.

11.3 The Skill Ecosystem

Skills are the execution packages that give K0RE its capabilities. A skill is not a prompt template — it is a full execution system containing domain knowledge, input/output schemas, tool permissions, context injection rules, and chain triggers.

Skill Architecture

Component	Purpose	Example (Mortgage Deal Analyzer)
System Prompt	Teaches the model how to think about this domain	You are an expert mortgage underwriter analyzing
Input Schema	Defines required data from user + K0RE context	Property address, purchase price, down payment,
Output Definition	Specifies deliverables produced	Multi-tab Excel model, PDF summary, risk score
Tool Permissions	Which capabilities the skill can invoke	Web search (market rates), file generation (Excel
Context Injection	What K0RE memory gets auto-included	User’s financial goals, risk tolerance, portfolio his
Chain Triggers	Other skills triggered on completion	→ Investment Decision Framework → Deal Mem

Skill Categories

- **Core K0RE Skills (Built-in):** Assessment engine, domain scoring, journal system, Perfect Day design, daily dashboard, K0RE Chat, morning/evening rituals. Included with all tiers.
- **Domain Skill Packs:** Pre-built skill bundles for specific life domains. Real estate investing, fitness programming, meal planning, financial planning, business strategy, creative writing, career development. Available at Operator tier and above.

- **Expert Skill Packs:** Premium skills created by recognized experts and thought leaders. Partnered content from domain authorities. Available at Commander tier and above.
- **Community Skills:** User-created skills shared to the marketplace. Revenue share model — creators earn when their skills are installed. Available at Commander tier and above.
- **Custom Skills:** Users build their own private skills for personal or business use. Available at Architect tier.

Skill Chaining

Skills don't operate in isolation — they chain together based on intent. A single user request can trigger a multi-skill workflow that produces multiple deliverables automatically.

Example: 'I want to buy a rental property at 123 Main St'

- Step 1 → Property Assessment Skill: Market analysis, comparable sales, rental estimates
- Step 2 → Financial Modeling Skill: Cash flow projections, mortgage scenarios, IRR analysis (Excel output)
- Step 3 → Risk Assessment Skill: Market risk, tenant risk, interest rate risk scoring
- Step 4 → Deal Memo Skill: Branded PDF summary with recommendation
- Step 5 → Task List Skill: Action items, due diligence checklist, timeline

One intent. Five deliverables. All built on the user's persistent context. That is a COO, not a chatbot.

Skill Marketplace & Revenue Share

The Skill Marketplace creates a flywheel: experts publish skills → users install them → creators earn revenue → library grows → platform becomes more valuable → more users join → more experts publish.

Role	Action	Revenue
Skill Creator	Publishes a skill pack to the marketplace	70% of skill revenue (install fees or usage fees)
K0RE Platform	Hosts, distributes, processes payments	30% platform fee
User	Installs and uses skills	Pays per-skill or included in tier

11.4 Collective Intelligence Network

This is where K0RE transcends individual AI assistance and becomes a true network intelligence. With user consent, anonymized patterns are aggregated across the entire K0RE community to surface insights that no individual could discover alone.

How Collective Intelligence Works

1. Individual Sovereignty: Each user's data remains encrypted and private. No individual data is ever shared.
2. Pattern Aggregation: K0RE identifies anonymized patterns across the network. Example: 'Users who improved Health domain by 20+ points in 90 days most commonly used these 3 skills and these 2 daily practices.'
3. Insight Distribution: Aggregated insights are pushed back to relevant users as suggestions. 'Based on network data, users in your situation found success with X approach.'
4. Skill Optimization: Popular skills get refined based on aggregate outcome data. A financial modeling skill gets better as thousands of users run it and K0RE learns which outputs led to good decisions.
5. Community Benchmarking: Users can opt-in to see how their domain scores compare to anonymized cohorts (same age, similar goals, same region).

Network Intelligence Use Cases

- **Skill Recommendations:** 'Users with similar Wealth domain goals achieved 34% faster progress using the Cash Flow Mastery skill pack.'
- **Pattern Alerts:** 'Your Health domain typically drops 8 points during Q4 — here are 3 strategies that helped similar users maintain their scores.'
- **Community Insights:** 'This week, the top-performing practice across the network was morning journaling + cold exposure. Your Health domain could benefit.'
- **Outcome Optimization:** 'Users who run deal analyses before purchasing property report 23% higher satisfaction with their investments 12 months later.'

The network gets smarter as it grows. Every user who journals, scores their domains, and uses skills contributes (anonymously) to the collective intelligence that benefits everyone. This is Cal's original vision — K0RE as a collective intelligence network where sovereign individuals grow together.

11.5 AI Execution Capabilities

K0RE can produce any deliverable that the underlying AI models can create. The full execution capability set includes:

Category	Capabilities
Financial Modeling	Budgets, forecasts, cash flow analysis, IRR projections, amortization schedules, scenario modeling
Document Generation	Business plans, deal memos, proposals, contracts, letters, reports, SOPs
Data Analysis	Pattern detection, trend analysis, comparisons, benchmarking, scoring
App & Tool Building	Custom calculators, trackers, dashboards, mini-apps, automations
Research & Intelligence	Market research, competitive analysis, due diligence, trend reports
Creative & Content	Marketing copy, social posts, presentations, email sequences, pitch decks
Planning & Strategy	Goal setting, OKRs, project plans, decision frameworks, risk assessments
Coaching & Guidance	Domain-specific advice, habit design, accountability, skill development

11.6 Delegation & Proactive Mode

K0RE doesn't just wait for commands — it operates as a proactive Chief Operating Officer that anticipates needs and initiates workflows.

Scheduled Delegation

- 'Every Monday morning, pull my calendar and draft my weekly priorities.'
- 'Every month-end, generate my financial summary with spending breakdown.'
- 'Every Friday, create a domain scorecard comparing this week to last week.'

Pattern-Triggered Actions

- 'When I journal about stress for 3+ consecutive days, suggest intervention strategies.'
- 'When my Wealth domain drops below 60, run a financial health check and surface recommendations.'
- 'When a new deal enters my pipeline, automatically run a preliminary assessment.'

Morning Brief (Proactive)

Every morning, K0RE can automatically generate a personalized briefing: domain scores and trends, calendar overview, top priorities from Perfect Day design, any pattern alerts from journal analysis, skill recommendations based on current goals, and network intelligence insights relevant to the user's situation.

11.7 Membership Tiers & Model Access

Model access, voice capabilities, meeting intelligence, and the full K0RE execution engine are bundled into membership. K0RE negotiates enterprise API agreements with all providers, buying tokens wholesale. Pricing reflects the true value delivered — persistent AI COO with multi-model access, voice conversations, meeting recording, whisper coaching, relationship intelligence, and skill execution.

Tier	Name	Price	Model Access	Voice
0	Observer	Free	Light models only (Haiku, Flash, GPT-4o-mini). 30 interactions/day	No voice
1	Operator	\$78/mo	Standard models (Sonnet, GPT-4o, Gemini Pro). Unlimited standard	Voice
2	Commander	\$198/mo	ALL models incl. Opus, o1, Gemini Ultra. Priority processing	Unlimited
3	Architect	\$398/mo	ALL models + dedicated capacity. Highest priority	Unlimited
4	Enterprise	\$98/seat/mo (min 10)	Dedicated model instances. Custom fine-tuning	Unlimited

Usage Credits System

Rather than hard caps that frustrate users, K0RE uses a monthly credit allowance system. Each interaction type costs a defined number of credits based on the underlying resource cost:

Action	Credit Cost	Notes
Light model call (Haiku/Flash/Mini)	1 credit	Daily check-ins, quick Q&A, nudges
Standard model call (Sonnet/GPT-4o/Pro)	5 credits	Document generation, analysis, coaching
Deep work model call (Opus/o1/Ultra)	25 credits	Complex modeling, strategic planning, app generation
Meeting recording (per hour)	10 credits	Transcription + speaker ID + summary
Whisper coaching (per session)	15 credits	Real-time suggestions during live calls
Real-time translation (per hour)	20 credits	Bidirectional live translation
File generation (Excel/PDF/DOCX)	3 credits	Per deliverable produced

Tier	Monthly Credits	Overage	Rollover
Observer	100 credits	No overage — throttled to light model	No rollover
Operator	2,000 credits	\$0.05 per additional credit	Up to 2x cap (4,000 max banked)
Commander	8,000 credits	\$0.03 per additional credit	Up to 2x cap (16,000 max banked)
Architect	25,000 credits	\$0.02 per additional credit	Up to 2x cap (50,000 max banked)
Enterprise	Custom pool	Volume pricing negotiated	Custom retention policy

Credit rollover rewards loyal users — unused credits from this month bank into next month (up to 2x cap). Users never get locked out of K0RE; when credits are exhausted, they’re gracefully throttled to lighter models rather than cut off entirely.

Annual Pricing (20% Discount)

Tier	Monthly	Annual (per month)	Annual Total	Savings
Operator	\$78/mo	\$58/mo	\$696/year	\$240/year saved
Commander	\$198/mo	\$158/mo	\$1,896/year	\$480/year saved
Architect	\$398/mo	\$318/mo	\$3,816/year	\$960/year saved

Annual commitment reduces churn, improves LTV, and provides predictable revenue. Users who commit annually also get priority access to new model releases and beta features.

Unit Economics

Enterprise API agreements provide 50-70% discount vs. consumer pricing. Estimated cost per user per month:

Tier	Revenue	Est. Cost/User	Gross Margin	Notes
Observer	\$0	<\$0.50	N/A (acquisition)	Negligible cost, high conversion funnel
Operator	\$78	\$15-20	~75%	Standard models + basic voice/recording
Commander	\$198	\$35-50	~78%	Premium models + full voice + whisper + relationship
Architect	\$398	\$60-80	~80%	Unlimited everything + team seats + marketplace
Enterprise	\$98/seat	\$30-40/seat	~65%	Dedicated capacity, higher cost but volume

These are strong SaaS margins that improve with scale as enterprise API volume discounts increase. The credit system provides natural cost protection against runaway usage while keeping the user experience frictionless.

11.8 Voice-First Conversational Interface

K0RE is not text-only — it is a full conversational AI with voice input, voice output, and customizable voice personas. Users can have real-time spoken conversations with K0RE in any context: driving, walking, exercising, cooking, or lying in bed. Voice transforms K0RE from a tool you use at a desk into a companion that travels with you.

Voice Personas

K0RE does not have one generic AI voice. The voice adapts to context — or users can customize their preferred persona.

Persona	Tone	Best For
The Operator	Sharp, direct, efficient	Business execution, deal analysis, task management, financial modeling
The Mentor	Calm, warm, encouraging	Coaching, domain check-ins, journaling, personal development
The Strategist	Measured, analytical, challenging	Strategic planning, decision frameworks, risk assessment
The Guide	Grounded, present, mindful	Morning rituals, meditation, evening reflection, spiritual domain
Custom	User-defined	Users can create or select from a library of voice styles and personalities

Voice selection can be automatic (K0RE picks the right persona for the context) or manual (user sets a default or switches mid-conversation).

Two Voice Modes

Command Mode — Quick and transactional:

- 'K0RE, add this to my Wealth domain tasks.' → Done. Confirmation. Move on.
- 'K0RE, what's my Health score this week?' → Quick answer with trend.
- 'K0RE, run a quick assessment on 45 Elm Street.' → Property highlights read aloud while driving.

Conversational Mode — Deep, multi-turn dialogue:

- 'K0RE, let's talk through this deal I'm looking at.' → K0RE asks follow-up questions, challenges assumptions, walks through analysis like a partner.
- 'K0RE, I'm feeling stuck on my business this week.' → Coaching conversation, pulls journal patterns, suggests interventions.
- 'K0RE, prep me for my meeting with the investors.' → Briefs you verbally, quizzes you on key points, role-plays tough questions.

Both modes leverage persistent memory — K0RE already knows who you are, what you're working on, and what happened yesterday.

Voice Journaling

Instead of typing journal entries, users talk. K0RE transcribes in real-time, extracts key themes, maps content to the 6 domains, detects emotional tone, and stores everything in persistent memory. This single feature transforms journaling from a chore into a natural conversation.

- Automatic domain classification: 'I closed the Henderson deal today' → Wealth domain tagged
- Emotional tone detection: Stress patterns, gratitude themes, energy levels extracted from voice
- Pattern surfacing: 'You've mentioned feeling drained on Thursdays three weeks in a row — want me to analyze your Thursday schedule?'
- Structured output: Voice journal → transcription + domain tags + sentiment + key themes + action items

Multi-Turn Voice Conversations

K0RE supports extended voice sessions — 5, 10, 30 minute conversations where the user thinks out loud and K0RE serves as an active thinking partner. At the end, K0RE generates a structured summary with action items, decisions made, and follow-ups — all deposited in the vault and linked to relevant domains.

Async Voice Memos

Users can send voice memos to K0RE throughout the day like texting a friend. 'Hey K0RE, just left the Johnson property, it's a 4-unit, needs about 200K in reno, I think the ARV is around 1.2M — run the numbers when you get a chance.' K0RE processes asynchronously and the full analysis is waiting in the vault next time they open the app.

11.9 Meeting & Conversation Intelligence

K0RE records, transcribes, and processes any conversation the user is in — Zoom calls, phone calls, in-person meetings, or casual voice notes. Unlike basic transcription tools (Otter, Fireflies, Granola), K0RE doesn't just transcribe — it understands context through persistent memory, extracts structured intelligence, and chains skill execution on the outputs.

Recording Capabilities

Source	How It Works	
Zoom / Google Meet / Teams	K0RE plugin auto-joins as a participant or captures system audio	C
Phone Calls (Cellular)	Companion app records with consent. Handles 1-party/2-party consent per jurisdiction	F
In-Person Meetings	Ambient recording via phone microphone. Tap to start/stop	T
Browser-Based Calls	Chrome extension captures audio from any web-based communication platform	M
Voice Notes / Memos	Quick capture anytime — walking out of a meeting, driving, between calls	F

Post-Conversation Intelligence

The moment a conversation ends, K0RE produces structured outputs — not just a raw transcript:

- Executive Summary: 3-5 sentence overview of what was discussed, decided, and what remains open
- Action Items: Every commitment extracted, assigned to the responsible party, with suggested deadlines
- Decisions Made: Key decisions captured as structured records, linked to relevant domains and projects
- Follow-Up Queue: Automated next steps — emails to draft, meetings to schedule, documents to prepare
- Domain Tagging: Content auto-classified across the 6 life domains for pattern tracking
- Sentiment Analysis: Emotional dynamics of the conversation — who was engaged, where tension arose, overall tone

Post-Conversation Skill Chains

After a meeting ends, K0RE doesn't just summarize — it automatically chains skills based on what was discussed:

Sales call → auto-drafts follow-up email → updates deal stage → schedules next touch

Investor meeting → generates updated financial model → drafts investor update letter

Property viewing → runs property assessment → builds comparison against other properties viewed this month

Mortgage lead call → creates loan intake → scores risk → queues deal memo generation

The user hangs up the phone and the work is already done.

Real-Time Whisper Coaching

During live calls, K0RE can feed real-time suggestions via on-screen text overlay or subtle audio in one ear. The user gets a world-class advisor in every meeting without anyone else knowing.

Scenario

Prospect mentions budget concerns for the second time
Counterparty makes a claim about market rates
You promised something in a prior meeting you haven't delivered
Negotiation is stalling on terms
Key decision-maker asks about a competitor

K0RE Whisper

'They've flagged budget twice — consider offering the a
'Their number is 15% above current market. Here's the
'Reminder: You committed to sending the updated proj
'Based on 47 similar deals in the network, the most com
'Competitor X launched a new feature last week. Here a

Whisper mode uses the fastest available model (Haiku/Flash) for sub-second response times. It pulls from persistent memory, live web data, and collective intelligence to surface exactly what the user needs in the moment.

Relationship Intelligence

Every conversation K0RE records builds a persistent relationship graph. Over time, K0RE maintains a living dossier on every person the user interacts with — all extracted automatically from conversations, never manually entered.

- Last interaction: When you last spoke, what you discussed, what the tone was
- Commitments tracker: What they promised you, what you promised them, and the status of each
- Communication style: How they prefer to communicate, their decision-making patterns, what motivates them
- Relationship health: Engagement trend, sentiment over time, flagged if a relationship is cooling
- Pre-meeting briefs: Before any meeting, K0RE auto-generates a brief covering all past interactions, open commitments, and suggested talking points

This creates an automatic CRM populated entirely by actual conversations — no manual data entry ever.

Embedded Integration Layer

K0RE should not live only in its own app — it should be an ambient layer embedded in the tools users already use:

Integration

Zoom / Meet / Teams
Chrome Extension
Phone Companion
Desktop Widget
Slack / Discord

Form Factor

Native plugin, auto-joins meetings
Browser overlay for any web app
Background service on iOS/Android
Always-on ambient listener (macOS/Windows)
Bot integration in team channels

Capabilities

Record, transcribe, whisper coach, auto-summarize
Capture browser calls, overlay whisper UI, quick
Record cellular calls (with consent), transcribe, p
In-person meeting capture, quick commands, not
Summarize threads, answer questions with K0RE

Email Integration	Gmail / Outlook plugin	Draft replies using K0RE context, summarize the
Calendar Integration	Google Calendar / Outlook	Auto-prep briefs before meetings, schedule follow

Sentiment & Pattern Analysis Over Time

K0RE tracks conversational patterns across months of interactions to surface meta-insights:

- 'Your calls with Client X have become increasingly tense over the last 3 meetings. The main friction point is timeline expectations.'
- 'Your close rate is 40% higher on calls where you lead with the case study. Consider this approach with Prospect Y.'
- 'You tend to over-commit on timelines during afternoon calls. Your morning commitments are 23% more realistic.'
- 'Deals discussed with the Operator voice persona have a 15% higher progression rate than those using default voice.'

Team Intelligence (Enterprise)

At Architect/Enterprise tier, conversation intelligence aggregates across teams:

- Manager dashboards: Call volume, objection trends, sentiment scores per rep, deal stall points
- Coaching insights: 'Rep A spends 70% of call time talking — top closers on the team are at 40%'
- Competitive intelligence: Most mentioned competitors across all team calls, trending objections, win/loss patterns
- Training content: Auto-generate training materials from the best-performing call recordings

Multi-Language Real-Time Translation

K0RE translates conversations in real-time across languages. A user can be on a call with a Mandarin-speaking investor and K0RE handles bidirectional translation — the user hears English, the counterparty hears Mandarin. This opens international markets instantly and removes language as a barrier to relationship-building.

Compliance & Consent Management

For regulated industries (mortgage, finance, legal, healthcare), K0RE handles recording compliance automatically:

- Jurisdiction-aware consent: Auto-detects 1-party vs 2-party consent requirements based on location
- Automated disclosures: 'This call may be recorded for quality purposes' — built in, legally compliant
- Retention policies: Configurable recording retention periods per regulatory requirement
- Audit trails: Complete chain of custody for all recorded conversations
- Selective redaction: Auto-detect and redact sensitive information (SSN, account numbers) from transcripts

Voice Technology Stack

K0RE wraps the best available real-time voice and speech APIs — the same multi-provider strategy used for text models:

Capability	Providers	Notes
Speech-to-Text	Whisper (OpenAI), Deepgram, Google Speech, AssemblyAI	Multi-speaker diarization, real-time s
Text-to-Speech	ElevenLabs, OpenAI TTS, Google WaveNet, PlayHT	Voice cloning for personas, emotional

Real-Time Voice AI Translation	Anthropic Voice, OpenAI Realtime API, Google Gemini Live Google Translate API, DeepL, Meta SeamlessM4T	Full conversational mode, sub-second Real-time bidirectional, 100+ languages
--------------------------------	---	---

11.11 Network Knowledge Library

K0RE aggregates a shared knowledge library across the entire network — think of it as a collective Audible, but owned by the community. Members can share audiobooks, courses, training materials, and curated content through integrated library accounts.

- Shared Audible/audiobook account integration — K0RE negotiates enterprise library licenses with Audible and other platforms
- Members can share highlights, notes, and takeaways from books (anonymized or attributed)
- K0RE can synthesize book content into actionable skill chains
- Community-curated reading lists per domain
- Audio content feeds into K0RE’s memory — ‘I read this book last month’ becomes searchable context
- Voice-narrated summaries from K0RE in the user’s preferred persona voice

11.12 The RedPaper

The RedPaper is K0RE’s foundational manifesto — Part 1 of the philosophical framework that underpins every feature, every algorithm, and every interaction within the CLTRN ecosystem. Unlike traditional whitepapers that present technical architecture, the RedPaper presents the consciousness architecture — the WHY behind K0RE.

- RedPaper Part 1 is already audio-captured by Cal (K0RE-0)
- K0RE’s voice synthesis engine will perfect and extend Cal’s voice to complete the narration
- The RedPaper will be available as audio (Cal’s voice, AI-enhanced), written document, and interactive experience
- It serves as the philosophical anchor for new members — their first deep exposure to K0RE’s worldview
- Future RedPaper volumes can be created by the community (Architects tier and above)
- This is NOT a sales document — it is a living philosophical text that evolves with the network

11.13 Competitive Moat — Why K0RE Is Uncopyable

Three compounding advantages that deepen with every user and every day:

- **1. Context Depth:** Every journal entry, domain score, goal, and reflection makes K0RE smarter about that specific user. After 6 months, no competitor can replicate this overnight. Starting over means losing months of accumulated intelligence.
- **2. Skill Network Effects:** Every skill created by every user or expert makes the platform more valuable for everyone. At 500+ marketplace skills, a new user on day one has access to capabilities that took the community months to build.
- **3. Output Accumulation:** Every deliverable K0RE creates lives in the user’s vault and becomes context for future work. ‘Update my Q1 budget with Q2 actuals.’ The work compounds. Leaving means leaving behind your entire operational history.
- **4. Collective Intelligence:** The network gets smarter as it grows. Anonymized pattern aggregation means K0RE’s recommendations improve with every user who joins. This is a true network effect that accelerates over time.

This is not an AI wrapper. This is a sovereign operating system for human performance with an execution engine, persistent memory, and collective intelligence. No other platform combines all four.

12. Database Schema (80+ Tables)

Complete K0RE Network Database Schema derived from Cal’s canonical spec. Tables use `cl_` prefix in Supabase implementation. Organized by domain.

Domain	Table Count	Priority	Key Tables
Core Identity & Auth	4	P0	<code>cl_users</code> , <code>cl_user_profiles</code> , <code>cl_user_activity_log</code> , <code>cl_auth_tokens</code>
Transformation Journey	11	P0	<code>cl_phases</code> , <code>cl_modules</code> , <code>cl_user_phases</code> , <code>cl_user_modules</code> , <code>cl_user_journey_data</code>
Membership & Progression	3	P1	<code>cl_membership_levels</code> , <code>cl_user_memberships</code> , <code>cl_membership_progression</code>
TEV (Time-Equity-Value)	5	P2	<code>cl_equity_projects</code> , <code>cl_tasks</code> , <code>cl_time_contributions</code> , <code>cl_equity_calculations</code>
Network & Rewards	5	P2	<code>cl_connections</code> , <code>cl_referrals</code> , <code>cl_connection_impact</code> , <code>cl_rewards</code>
Governance & Voting	7	P3	<code>cl_governance_proposals</code> , <code>cl_voting_records</code> , <code>cl_governance_documents</code>
Kore Kode of Divinity	5	P2	<code>cl_kode_principles</code> , <code>cl_member_kode_adherence</code> , <code>cl_kode_rewards</code>
Kore Cerebro Knowledge Base	7	P2	<code>cl_cerebro_categories</code> , <code>cl_cerebro_subcategories</code> , <code>cl_cerebro_entries</code>
Tokenization & Incentives	7	P3	<code>cl_tokens</code> , <code>cl_wallets</code> , <code>cl_token_transactions</code> , <code>cl_incentives</code> , <code>cl_rewards</code>
Communication	6	P2	<code>cl_messages</code> , <code>cl_discussion_threads</code> , <code>cl_thread_comments</code> , <code>cl_notifications</code>
Events & Content	4	P2	<code>cl_events</code> , <code>cl_user_event_registrations</code> , <code>cl_articles</code> , <code>cl_content_resources</code>
Gamification	2	P2	<code>cl_badges</code> , <code>cl_user_badges</code>
Analytics & Compliance	6	P1	<code>cl_user_analytics</code> , <code>cl_system_reports</code> , <code>cl_user_agreements</code> , <code>cl_compliance_logs</code>
Pre-Qualification	5	P1	<code>cl_pre_qualification</code> , <code>cl_pre_qual_questions</code> , <code>cl_user_pre_qual_data</code>
Relationships	1	P2	<code>cl_relationships</code>

Total: 83 tables across 15 domains

11.1 MVP Schema (Feb 23 — 22 tables)

For the initial launch, implement these core tables:

- Identity: `cl_users`, `cl_user_profiles`, `cl_auth_tokens` (3)
- Assessment: `cl_assessments`, `cl_user_data`, `cl_pre_qualification`, `cl_pre_qual_questions`, `cl_user_pre_qual_answers`, `cl_pre_qual_criteria`, `cl_user_pre_qual_score` (7)
- Journey: `cl_phases`, `cl_modules`, `cl_user_phases`, `cl_user_modules` (4)
- Execution: `cl_project_tasks`, `cl_user_activity_log` (2)
- Membership: `cl_membership_levels`, `cl_user_memberships` (2)
- Content: `cl_content_resources`, `cl_cerebro_entries` (2)
- Analytics: `cl_user_analytics`, `cl_system_reports` (2)

13. Membership Model (11 Levels)

Level	Name	Access	Revenue Model
0	Merchandise / Brand	Branded products, intro content	Product sales
1	Learn	Masterclasses, courses, webinars, Cerebro access	Subscription (\$49/mo)
2a	Transform	1:1 mentorship, coaching, guided transformation	Premium subscription (\$199/mo)
2b	Play	Deal flow access, value sharing, crypto insights	Commission / referral fees
3	Stay	SOT retreats, short/long-term rentals	Booking fees / rental income
4	Create Business Systems	TEV Framework, business building tools	Equity participation / SaaS
5	Create New Communities	Licensing to launch new K0RE nodes	Licensing fees
6-10	Leadership & Legacy	Inner council, research, philanthropy, cultural exchange, mentorship	Strategic / partnership

12.1 Consciousness Assessment (Onboarding)

New members undergo a consciousness assessment covering: self-awareness, emotional intelligence, decision-making quality, value alignment, growth orientation. Scored across dimensions with AI-assisted interview protocol (KCIP v1.0). Results determine starting level and personalized transformation roadmap.

12.2 Pricing Strategy (Test Group)

For the Feb 23 test group launch, targeting Level 1-2 (Learn + Transform) at premium pricing (\$97-197/mo) to validate the premium positioning. Free trial for test group with conversion to paid after 30 days.

14. TEV (Time-Equity-Value) Framework

TEV governs how contributions are valued and how equity/ownership is allocated within the K0RE ecosystem.

13.1 Core Formula

Total Contribution Score (TCS) = (T x 0.3) + (E x 0.2) + (V x 0.5)

- T (Time): Hours contributed
- E (Energy): Effort/impact score (1-10, weighted by engagement, impact, initiative, collaboration, consistency)
- V (Value): Financial/resource contribution

13.2 Equity Rate Calculation

Time-Equity Rate = Average(Market Hourly Rate, Current Rate) + Startup Risk Premium (15-20%). 38% equity pool allocated to skilled resources (co-founder pool). Share issuance at: year-end OR \$3M CAD retained earnings OR seed funding round.

13.3 TEV Cannot Override Ethics or Sovereignty

TEV is subordinate to the constitutional framework. No contribution calculation may: commodify human identity, force participation, create coercive incentive structures, or bypass consent requirements.

15. Tech Stack & Infrastructure

15.1 Platform Matrix — Four Surfaces, One Intelligence

K0RE is not a single app — it is a multi-platform operating system. The same persistent memory, vault, relationship graph, and skill engine powers every surface. Users move seamlessly between platforms throughout their day.

Platform	Form Factor	Primary Use Cases
Mobile App (iOS + Android)	React Native + Expo	On-the-go voice, journaling, quick commands, notifications
Desktop App (macOS + Windows)	Electron + React	Deep work, ambient recording, system-wide overlay, power
Web App	Next.js (React)	Universal access, browser-based recording, no-install onboa
Browser Extension	Chrome/Edge Extension	Passive capture, whisper overlay, quick commands from an

Desktop App — The Power User's Home Base

The desktop app is the ambient intelligence hub. It runs natively on macOS and Windows, sitting in the menu bar or system tray, always available.

- Global Hotkey: Summon K0RE anywhere with a keyboard shortcut — overlay appears on top of any app. Ask a question, get an answer, dismiss it. Never leave your workflow.
- System Audio Capture: Records any call happening on the computer — Zoom, Meet, Teams, Discord, FaceTime, browser calls — without needing individual plugins. One app captures everything.
- Ambient Microphone: In-person meeting recording from desk microphone. Tap to start/stop.

- File System Integration: Drag files into K0RE for analysis. Generated deliverables save directly to local folders.
- Multi-Monitor Support: K0RE dashboard on second screen while working. Real-time whisper coaching visible alongside call window.
- Offline Mode: Core journaling, domain scoring, and voice memos work offline. Syncs when connection returns.

Web App — Universal Access

The web app delivers the full K0RE experience through any modern browser with no installation required.

- Browser Recording: WebRTC-based microphone and screen audio capture for meeting recording directly in-browser.
- Full Dashboard: Domain scores, vault, relationship graph, skill marketplace, analytics — all accessible from any device with a browser.
- Enterprise Admin: Team management, user provisioning, compliance dashboards, and skill library management.
- Onboarding Funnel: New users start with the web app (zero friction) and graduate to desktop/mobile for full ambient capabilities.
- Progressive Web App (PWA): Installable from browser for app-like experience on Chromebooks, tablets, and restricted corporate devices.

Cross-Platform Sync

All platforms share one real-time backend. A voice journal captured on mobile during a morning walk appears on the desktop dashboard seconds later. A deal memo generated on desktop is accessible from the mobile vault on the way to a meeting. Meeting recordings from the web app feed into the relationship graph visible everywhere. Nothing is siloed.

15.2 Core Tech Stack

Layer	Technology	Notes
Mobile App	React Native + Expo	iOS + Android from single codebase
Desktop App	Electron + React	macOS + Windows. Shared React component library with
Web App	Next.js (React) + Vercel	SSR, PWA support, CDN-edge deployment
Browser Extension	Chrome Extension (Manifest V3)	Content scripts for overlay, background service for capturing
Backend	Supabase (PostgreSQL + Edge Functions)	Auth, DB, Storage, Realtime in one platform
AI Layer	Anthropic, OpenAI, Google APIs	Multi-model routing, K0RE-GPT kernel as system prompt
Voice / STT	Whisper, Deepgram, AssemblyAI	Real-time transcription, speaker diarization, 50+ languages
Voice / TTS	ElevenLabs, OpenAI TTS, PlayHT	Voice personas, emotional range, ultra-low latency
Real-Time Voice	Anthropic Voice, OpenAI Realtime	Full conversational mode, sub-second response
Auth	Supabase Auth (JWT + OAuth)	Social login + email/password + biometric
Storage	Supabase Storage + R2/S3	Media, documents, recordings. Tiered hot/cold storage
Realtime	Supabase Realtime (WebSocket)	Live notifications, chat, activity feeds, cross-device sync
Push Notifications	Expo + Firebase + APNs	Cross-platform push for mobile and desktop
Payments	Stripe (Billing + Connect + Checkout)	Subscriptions, one-time purchases, marketplace payouts, etc.
Analytics	PostHog or Mixpanel	User behavior, engagement, conversion, funnel analysis
Design System	Figma + Storybook	Shared component library across all platforms
Blockchain	Cardano (deferred)	Phase 3 — tokenization, DAO, KoreChi
CI/CD	GitHub Actions + EAS Build + Vercel	Automated builds, testing, deployment across all platforms

15.3 Supabase Project Structure

Project	Purpose	Tables
CLTRN Main	Production — user-facing mobile app	cl_* tables (83 total, 22 MVP)
Command Center	Orchestration — agents, missions, events	ops_* tables (existing)
Trillium	Mortgage brokerage (Jason's division)	loans, deals (existing)
Arterial	SaaS sales (Jason's division)	art_* tables (existing)

15.4 Security & Compliance Requirements

- JWT-based auth with refresh tokens
- Row Level Security (RLS) on all tables — users can only access their own data
- Data encryption: AES-256 at rest, TLS 1.2+ in transit
- Audit logging: all data access and modifications logged
- GDPR right-to-erasure implementation
- Zero-knowledge architecture for sensitive data (journals, assessments)
- Rate limiting + DDoS protection via Supabase/Cloudflare

15.5 API & Developer Platform (Phase 2)

K0RE exposes a REST + WebSocket API for Architect tier and above, enabling developers to build custom integrations, skills, and white-label instances on top of K0RE's intelligence layer.

Endpoint Category	Purpose	Access
/api/memory	Read/write to persistent memory layers	Architect + Enterprise
/api/skills	Execute skills, chain skills, publish new skills	Architect + Enterprise
/api/score	Read K0RE Score and domain scores	All paid tiers (read-only)
/api/voice	Trigger voice sessions, submit audio, get transcripts	Commander + Architect + Enterprise
/api/meetings	Access meeting recordings, transcripts, action items	Commander + Architect + Enterprise
/api/webhooks	Subscribe to K0RE events (score changes, completions, alerts)	Architect + Enterprise

API authentication uses Supabase JWT tokens. Rate limits: Architect = 1,000 req/min, Enterprise = custom. Full OpenAPI spec and SDK (TypeScript, Python) published at docs.kore.ai.

15.6 Offline Mode & Data Portability

K0RE works without internet for core functions: journaling, Perfect Day review, cached meeting playback, and skill execution against local memory. Data syncs when connectivity returns. This matters for SOT retreats where connectivity is limited.

Data sovereignty means users can leave at any time. Full export available: JSON (structured data), CSV (tabular), PDF archive (formatted), and audio files. Export triggers no data loss — everything transfers. This builds trust and paradoxically reduces churn because users stay when they're not trapped.

15.7 Notification Intelligence

K0RE does not spam. It learns WHEN, HOW, and WHAT each user wants to hear. Some users want morning nudges. Others want evening recaps. Some want voice, others text. K0RE adapts notification timing, channel, and content based on behavioral patterns — not arbitrary schedules. The goal: every notification from K0RE should feel like it arrived at exactly the right moment.

16. Competitive Moat & Market Position

16.1 Replication Timeline by Competitor

Competitor Class	Timeline	Why They Can't Replicate
Big Tech (OpenAI, DeepMind, Anthropic)	12-18 months	Have resources but lack consciousness philosophy, ethical framework
Mid-Tier AI Startups	2-3 years	Struggle with NLP + consciousness integration at this depth
Solo Developers / Open Source	3-5 years or never	Lack the foundational philosophy, template library, and community

15.2 Key Barriers to Replication

1. Unique Thought Processing & Consciousness Engine (3-tier, first-mover, proprietary)
2. Real-Time AI Correction for Speech & Thought (not commercially available)
3. Integration of CLTRN 5.1's Proven Methodology (2+ years of daily use, iterated)
4. Constitutional Framework (no competitor has ethics-at-kernel-level)
5. Community & Network Effect (philosophy + values + lived proof cannot be copied)

15.3 Strategic Move

Launch ASAP > Protect IP > Innovate beyond 6.0 > Maintain 3-5 year lead

17. Revenue Model & Pricing

16.1 Revenue Streams

Stream	Source	Phase
Subscriptions	Level 1-2 membership (\$47-497/mo)	Phase 1 (MVP)
Premium AI	Advanced K0RE-AI features, unlimited chat	Phase 1
Merchandise	K0RE branded products (Level 0)	Phase 1
Coaching	1:1 mentorship, guided transformation	Phase 2
Retreats (SOT)	Experiential programs, short/long-term stays	Phase 2
Deal Flow	Investment opportunities, revenue share	Phase 2
Business Systems	TEV-powered tools, equity participation	Phase 3
Community Licensing	New K0RE node launches	Phase 3
Token Economics	KoreChi utility, staking, marketplace	Phase 4

16.2 Test Group Pricing (Feb 23)

Target: \$97-197/month for Level 1-2 access. This justifies building the real mobile app (not just Telegram). Premium pricing validates the value proposition and attracts committed test users.

18. Hormozi Growth Engine

Alex Hormozi's \$100M Offers, \$100M Leads, and \$100M Money Models applied to CLTRN's go-to-market strategy. Every element is designed to make CLTRN an irresistible offer with compounding virality.

17.1 Grand Slam Offer — Value Equation

$\text{Dream Outcome} \times \text{Perceived Likelihood} / (\text{Time Delay} \times \text{Effort \& Sacrifice}) = \text{Value}$

Component	CLTRN Implementation	Value Perception
Dream Outcome	Complete life transformation across 6 domains with AI coaching	\$10,000+
Perceived Likelihood	Data-driven tracking, quantified scores, proven 5.1 frameworks	High — visible Week 1 progress
Time Delay	Immediate AI coaching from Day 1, visible progress in Week 1	Minimal
Effort/Sacrifice	5 minutes/day check-in, AI does the analysis, you get insights	Low

17.2 Value Ladder

Level	Offer	Price	Purpose
Lead Magnet	Free Zero-Point Assessment	\$0	Capture leads, demonstrate value, create baseline
Tripwire	Consciousness Starter Kit (7-day)	\$8-\$28	Convert free to paid, reduce friction, prove value
Core Offer	K0RE SaaS Monthly/Annual	\$98-\$398/yr	Main revenue driver, recurring, 6-domain access
Order Bump	Domain Deep Dive Pack	\$48-\$98	Increase AOV at checkout, immediate upsell
Upsell	12-Week Transformation Program	\$498-\$998	High-touch, high-margin, guided transformation
Premium	SOT Retreat / VIP Coaching	\$2,888-\$8,888	Lifetime value maximizer, in-person experience
Legacy	Level 8-10 Membership + Governance	TEV-based	Long-term lock-in, K0RE civilization access

17.3 Growth Strategy: Rule of 100

Cal (K0RE-0) performs 100 outreach actions daily: social media posts, DMs, content creation, networking. Combined with paid acquisition using the 70/20/10 framework:

- 70% Proven channels: Daily transformation content on Instagram, YouTube, LinkedIn
- 20% Testing: New formats, platforms, collaborative content, podcasts
- 10% Experimental: Live events, viral campaigns, unconventional partnerships

17.3a Onboarding: The First Dream

The first 7 minutes in K0RE determine lifetime retention. The onboarding sequence — called 'The First Dream' — is a voice-guided experience that builds the foundation of persistent memory.

Step	Duration	What Happens
1. Welcome	30 seconds	K0RE introduces itself by name and voice. User chooses their preferred voice persona.
2. The Question	2 minutes	K0RE asks: 'If you could wake up tomorrow and everything was exactly as you dreamed, what would it be?'
3. Domain Scan	3 minutes	Quick self-assessment across 6 life domains (1-10 slider each). K0RE generates initial K0RE score.
4. First Perfect Day	1 minute	K0RE designs their first Perfect Day based on responses. User confirms or adjusts.
5. Commitment	30 seconds	K0RE asks: 'What's one thing you'll do today to start creating your Dreaming Reality?'

After The First Dream, K0RE has enough context to be genuinely useful from interaction #2 onward. The user has invested emotionally — they've told K0RE their dream. That creates a bond no competitor can replicate with a sign-up form.

17.4 Retention Flywheel

- Streak Mechanics: Daily check-in streaks with milestone rewards (14-day streak = 85%+ retention)
- Weekly Wins: Progress highlights, celebration of improvements, data-driven reframing of setbacks
- Quarterly Re-Assessment: Full Zero-Point re-test with side-by-side score comparison — shows tangible growth
- Domain Unlocks: Progressive engagement across domains as users advance through levels
- Community Accountability: Peer groups, shared challenges, public commitments (Phase 3)
- Cal's Monthly Live: Exclusive Q&A for active subscribers — founder-led retention
- K0RE Chat Depth: AI relationship deepens over time — switching cost increases with every interaction

17.5 Irresistible Guarantee

If you complete 30 days of daily check-ins and don't see measurable improvement in at least 2 of your 6 life domains (tracked by data, not feelings), we refund 100%. This is possible because the Zero-Point Assessment creates a quantified baseline — improvement is provable.

17.6 Stripe Integration & Payment Infrastructure

K0RE uses Stripe as its complete monetization backbone — subscriptions, one-time purchases, marketplace payouts, and international billing. Stripe is integrated at every revenue touchpoint.

Stripe Products

Product	K0RE Use Case	Implementation
Stripe Billing	Recurring subscriptions (\$78-\$398/mo tiers)	Stripe Checkout → O
Stripe Checkout	One-time purchases (Starter Kit, Deep Dive Packs, Retreat deposits)	Pre-built hosted check
Stripe Connect	Skill Marketplace payouts (70/30 split to creators)	Connected accounts f
Stripe Invoicing	Enterprise contracts (\$98/seat, custom terms)	Automated invoicing
Stripe Tax	Global tax compliance across all jurisdictions	Automatic tax calcula
Stripe Revenue Recognition	ASC 606 compliance for SaaS revenue	Automated revenue r

Subscription Architecture

Each K0RE membership tier maps to a Stripe Price object. Upgrades and downgrades are prorated automatically. Annual plans are separate Price objects with 20% discount baked in.

Tier	Stripe Product	Monthly Price ID	Annual Price ID	Trial
Observer	prod_kore_observer	Free (no Stripe)	N/A	N/A
Operator	prod_kore_operator	price_operator_78	price_operator_annual_696	14-day free trial
Commander	prod_kore_commander	price_commander_198	price_commander_annual_1896	14-day free trial
Architect	prod_kore_architect	price_architect_398	price_architect_annual_3816	7-day free trial
Enterprise	prod_kore_enterprise	price_enterprise_98_seat	Custom	30-day pilot

Marketplace Payouts (Stripe Connect)

When a user purchases a community-built skill, Stripe Connect automatically splits the payment: 70% to the skill creator's connected Stripe account, 30% to K0RE. Payouts happen weekly. Creators see real-time earnings in their K0RE dashboard. This turns the Skill Marketplace into a true creator economy platform.

Webhook Architecture

Stripe webhooks trigger K0RE system events for real-time provisioning:

- checkout.session.completed → Provision user tier, unlock features, send welcome sequence
- customer.subscription.updated → Adjust feature access on upgrade/downgrade
- customer.subscription.deleted → Graceful downgrade to Observer, preserve all data
- invoice.payment_failed → Retry logic + gentle nudge via K0RE voice/text
- account.updated (Connect) → Update skill creator payout status
- payment_intent.succeeded → Confirm one-time purchases (kits, packs, retreats)

Revenue Dashboard

K0RE admin dashboard (for Cal) pulls directly from Stripe API: MRR, ARR, churn rate, LTV, conversion funnels, tier distribution, marketplace GMV, and creator payouts. All real-time. No separate analytics tool needed for revenue metrics.

17.7 Referral Engine: The Dream Network

Every K0RE member can invite others into the network. Referrals are incentivized with recurring credit rewards — not one-time bonuses. This turns members into long-term evangelists.

Referrer Tier	Reward	Cap	Mechanic
---------------	--------	-----	----------

Observer (Free)	100 bonus credits per referral	Unlimited	Credits unlock premium features witho
Operator (\$78)	8% of referee's subscription (recurring)	Up to 18 referrals	Applied as account credit, reducing mo
Commander (\$198)	18% of referee's subscription (recurring)	Up to 28 referrals	Applied as account credit or cash payo
Architect (\$398)	28% of referee's subscription (recurring)	Unlimited	Direct Stripe payout. Can fully offset s

The K0RE Score card is the primary referral vehicle. When users share their score on social media, it includes a unique referral link. The card is designed to create curiosity: 'My K0RE Score is 78 — what's yours?' This drives organic virality through identity and aspiration.

17.8 K0RE Coach Certification

K0RE Coaches are certified practitioners who use K0RE to serve their own clients — fitness coaches, life coaches, financial advisors, therapists. They pay \$98/mo for a Coach license (built on the Architect tier with white-label tools) and K0RE gains distribution through human networks.

- Certification requires completing K0RE's own 12-week transformation program
- Coaches get a white-labeled K0RE dashboard for their clients
- Coaches can create and sell custom skill packs through the marketplace
- K0RE handles all AI infrastructure — coaches focus on human connection
- Revenue share: Coach keeps 100% of their client fees, K0RE earns from the \$98/mo license + marketplace commissions

19. Acquisition Funnel & Contact Strategy

Multi-channel acquisition strategy with Cal as the content engine and K0RE as the conversion engine. Every touchpoint moves prospects through the value ladder.

18.1 Funnel Stages

Stage	Channel	Action	Target M
Awareness	YouTube, Instagram, LinkedIn, TikTok	Cal's daily content: consciousness + transformation	100K impr
Interest	Website, Telegram, Landing Pages	Free Zero-Point Assessment + lead capture	10% conve
Consideration	Email Nurture, Retargeting Ads	Results delivery + K0RE demo + value proof	25% assess
Conversion	Checkout, Sales Page	SaaS signup with order bumps + tripwire	5% purcha
Retention	In-app, Email, Community	Daily engagement, streak mechanics, K0RE Chat	60%+ mor
Advocacy	Referral Program, Social Sharing	Score sharing, affiliate commissions, referral rewards	20% refer

18.2 Content Strategy: Cal as Content Engine

Cal (K0RE-0) is the brand. The content strategy positions Cal as the living proof of the system — the person who built CLTRN by using CLTRN.

- Daily Transformation Content: 1 post/day minimum across Instagram, LinkedIn, YouTube Shorts, TikTok
- Weekly Deep Dives: YouTube long-form (15-30 min) on one life domain per week — rotation across all 6 domains
- Monthly Behind-the-Scenes: Building K0RE in public — development updates, user stories, data reveals
- Quarterly Proof Points: Cal's own Zero-Point re-assessment shared publicly — radical transparency

18.3 Paid Acquisition

Paid ads only after organic proves the message (Month 3+). Budget allocation:

Channel	Budget %	Target CPA	Creative Type
Instagram/Facebook Ads	40%	\$15-25	Video testimonials, before/after data, assessment preview
YouTube Pre-Roll	25%	\$20-35	Cal's story, 60-sec transformation hook
Google Search	20%	\$10-20	Keywords: 'life transformation app', 'consciousness assessment', 'life transformation app'
TikTok Spark Ads	15%	\$8-15	UGC-style, authentic transformation moments

18.4 SOT Perfect Day Retreat — Local Acquisition Engine

Sandals of Time retreats serve as the premium conversion event and local acquisition engine:

- Micro-luxury one-day curated transformational experience (6-12 people per session)
- Target: GTA high-performance professionals, spiritual seekers, wellness enthusiasts
- Referral network: Chiropractors, physiotherapists, yoga studios, psychotherapists, holistic clinics, high-end gyms
- Launch campaign: Teaser videos → Brand reveal → Founders Circle offer (\$50 off) → Referral program → Influencer retreat
- Every retreat attendee becomes a CLTRN user — retreat is the highest-conversion entry point

20. Mobile App UX Architecture

React Native + Expo mobile app with 5-tab navigation. Every screen maps to a CLTRN 5.1 template or K0RE function. Wireframes available as interactive HTML artifact (CLTRN-MOBILE-APP-WIREFRAMES.html) and FigJam user flow diagram.

19.1 Tab Navigation

Tab	Screen	Purpose	CLTRN 5.1
Tab 1: Today	Daily Dashboard	Morning check-in, top 3, K0RE insight, evening reflection	TODAY template
Tab 2: Chat	K0RE AI Coach	3-tier thought processing, voice input, context-aware coaching	K0RE-GPT
Tab 3: Journal	Journal Hub	Gratitude, Dream, Benchmark, Data Dump, Purpose, Voice journals	CLTRN 5.1
Tab 4: Domains	Life Domains	6-domain scores, trends, deep dives, progress tracking	QUEUE +
Tab 5: Profile	Human Entity	Sovereign ID, membership level, referral tree, K0RE CHI, settings	Identity + g

19.2 Core Screen Inventory

Screen	Type	MVP Priority	Key Components
Onboarding (3-step)	Flow	P0	Welcome, identity setup, assessment CTA
Zero-Point Assessment	Interactive	P0	30 questions, 6 domains, progress bar, score card
Score Card (Shareable)	Result	P0	6-domain scores, overall score, share button (viral)
Today Dashboard	Tab	P0	Check-in, priorities, insight, reflection
Morning Check-In	Modal	P0	Energy, mood, clarity, intention
K0RE Chat	Tab	P0	AI chat, thought tier badges, voice, context
Journal Hub	Tab	P1	6 journal types, creation, AI analysis
Perfect Day Builder	Screen	P1	Time blocks, ideal day design, gap tracking
Domain Deep Dive	Screen	P1	Trends, assessments, recommendations per domain
Community Hub	Tab	P2	Challenges, pods, leaderboards, referral invite
Profile / Entity	Tab	P1	Sovereign ID, membership, CHI, referrals, export
Settings	Screen	P1	Notifications, devices, AI preferences, privacy, subscription

19.3 Design System

- Colors: Black (#0A0A0A), Gold (#D4AF37), Silver (#B8B8B8), Charcoal (#1A1A1A), Light (#F5F5F5)
- Typography: SF Pro (iOS) / Roboto (Android) — system fonts for performance
- Components: Cards (white, 14px radius, subtle shadow), Buttons (primary red, secondary dark), Progress bars, Score rings
- Patterns: Bottom tab bar, pull-to-refresh, swipe gestures, haptic feedback on milestones
- Streak badge: Gradient orange-to-red pill with fire emoji and day count

21. Website Architecture & Conversion Strategy

Marketing website designed using Hormozi's value equation framework. Every section reduces perceived risk and increases perceived value. Wireframe available as interactive HTML (CLTRN-WEBSITE-WIREFRAME.html) and FigJam diagrams.

20.1 Page Structure (12 Sections)

Section	Purpose	Hormozi
1. Sticky Navbar	Logo, links, CTA (Take Free Assessment)	Persistent c
2. Hero	Dream outcome headline + score preview + dual CTA	Dream Out
3. Social Proof Bar	Trust signals: data sovereign, AI-powered, 5 min/day	Perceived I
4. 6 Life Domains	Visual showcase of what they'll transform	Dream Out
5. How It Works (3 Steps)	Assessment → Meet K0RE → Transform Daily	Reduce Tin
6. Core Features	6-card grid: Assessment, K0RE Chat, Dashboard, Journals, Perfect Day, Streaks	Perceived I
7. Value Ladder	Free → \$8 → \$98/mo → \$498 → \$2,888+	Ascending
8. Testimonials	3-card grid with score improvements	Social proo
9. Guarantee	30-day data-backed money-back guarantee	Risk revers
10. Pricing	3-tier: Free / \$98 Growth / \$398 Annual	Clear conve
11. Final CTA	Repeat assessment offer with urgency	Closing cor
12. Footer	Product, Company, Legal links	Navigation

20.2 Conversion Optimization

- Primary CTA: 'Take the Free Assessment' appears 4 times on page (nav, hero, mid-page, footer)
- No sign-up required before assessment — deliver value FIRST (Hormozi lead magnet principle)
- Score card is shareable — each share = free impression + warm lead (viral loop)
- Video demo in hero for visual learners + social proof seekers
- Guarantee section removes all risk — data-backed, not feelings-based
- Mobile-first responsive design — 70%+ traffic expected from mobile

20.3 Tech Stack (Website)

- Framework: Next.js (SSR for SEO + fast loading)
- Hosting: Vercel (auto-deploy, edge functions, analytics)
- CMS: Headless (Sanity or built-in) for blog/content marketing
- Analytics: PostHog (privacy-first) + Google Analytics (acquisition)
- Email: Resend or SendGrid for nurture sequences
- Assessment: Embedded React component (same codebase as mobile app)

22. Network Reward & Viral Growth System

The K0RE Network Connection Reward & Incentive Framework transforms every member into a growth engine through tokenized referrals, AI-driven matching, and multi-tier rewards.

21.1 Multi-Tiered Reward Structure

Total Connection Fee (TCF) = Opportunity Value $\times$ Connection Fee %. Distribution:

Component	Allocation	Description
Finder's Reward	50-70% of TCF	Primary referrer who sources the connection
In-Between Connections Reward (ICR)	20-40% of TCF	Distributed across up to 8 connection levels
Network Dividend	10% of TCF	Distributed to all active network members

21.2 8-Level Distribution Tiers

Level	Reward %	Description
1st Level	1.25%	Direct referrer
2nd Level	0.625%	Referrer's referrer
3rd Level	0.3125%	Two degrees removed
4th Level	0.15625%	Three degrees removed
5th-8th Level	Diminishing	Deep network rewards incentivize broad growth

21.3 Unique ReferralID System

- Every member gets a unique ReferralID — tracks flow from origin through connections to final conversion
- AI-driven opportunity matching engine trained on success patterns for automatic connection optimization
- Smart contract-based automated reward distribution — transparent, trustless, instant
- Connection path optimization algorithm identifies most efficient path with fewest necessary intermediaries
- Real-time connection mapping dashboard shows active connections, gaps, and strategic suggestions

21.4 K0RE CHI — Internal Currency

K0RE CHI is the internal economy currency (not crypto, not a security) — earned through value contribution:

- Earned by: Contributing value, teaching, hosting events, completing projects, helping members, attending retreats
- Spent on: SOT programs, practitioner sessions, CLTRN premium tools, TRMIG opportunities, member services
- Creates a circular private economy that incentivizes participation and locks in long-term engagement

21.5 Viral Mechanics Built Into Product

- Score Sharing: Users share Zero-Point Assessment results on social media — each share is organic lead gen
- Challenge Invites: Users invite friends to 7-day transformation challenges — viral loop with accountability
- Milestone Celebrations: App-generated shareable graphics for breakthroughs (new domain unlocked, streak milestone)
- Referral Dashboard: Every user sees their referral tree, earned rewards, and network growth in real-time
- Generational Lock-In: Family trust integration, lineage profiles, multi-generational value — members bring family

21.6 Network Versatility Across Subsidiaries

The K0RE referral network extends across all subsidiaries — a connection made for CLTRN can yield TRMIG real estate deals, SOT retreat bookings, PBOC financial opportunities, and TRM-M education enrollments. One network, infinite monetization paths.

23. Execution Roadmap

22.1 Phase 1: Genesis (Feb 14 - Feb 23) — MVP Launch

Day	Focus	Deliverables
1-2	Foundation	Supabase CLTRN project, core schema (22 tables), RLS policies, auth setup
2-3	K0RE Core	K0RE-GPT kernel as system prompt, thought processing logic, AI chat API
3-4	Mobile Shell	React Native + Expo project, navigation, auth screens, design system
4-5	Zero-Point Assessment	6-dimension questionnaire, scoring engine, current state report
5-6	Daily Dashboard	TODAY screen, daily check-in, top objectives, end-of-day reflection
6-7	K0RE Chat	AI chat interface, 3-tier thought processing, context-aware responses
7-8	Journals + Perfect Day	Journal creation, gratitude journal, Perfect Day baseline
8-9	Polish + Test	UI polish, bug fixes, test group onboarding flow, app store prep

22.2 Phase 2: Proof Engine (Mar - May 2026)

- Sprint system (weekly/monthly/annual)
- Community features (pods, messaging, groups)
- Cerebro knowledge base
- Wearable data integration
- Case study capture + before/after documentation
- Onboard POC cohort #2

22.3 Phase 3: Capital & Scale (Jun - Aug 2026)

- TEV framework implementation
- Treasury dashboard (NAV tracking)
- KoreChi token architecture
- DAO-ready governance voting
- Capital raise: \$150K-\$250K (convertible/LP)
- Inner Council recruitment

22.4 Phase 4: Sovereign Infrastructure (Sep 2026+)

- Blockchain integration (Cardano)
- Data sovereignty vault (encrypted, self-hosted option)
- Digital Twin v2 (cryptographic identity)
- Intelligence Fabric (post-LLM dependence)
- Network replication (K0RE nodes)
- Public launch + mass onboarding

24. Commander Team Requirements

Critical 4-6 person team needed to execute, ordered by leverage:

Role	Priority	Key Skills	Outputs
Strategic Ops Integrator	Immediate	PM tools, systems thinking, async ops, decentralized workflows	Execution roadmap
AI Engineer	Immediate	GPT API, Langchain, Node.js/Python, multi-agent systems	K0RE-AI Command
Legal Architect	Critical	Web3 legal, JV contracts, token law, DAO compliance	TEV agreements, legal
Brand/UX Designer	High	UI/UX, Figma, visual storytelling	App design, launch
Capital Catalyst	Strategic	Syndication, VC, private lending networks	\$150K-\$250K treasury
Community Builder	Phase 3	Onboarding, Discord, rituals, engagement	Community activation

25. Subsidiary Ecosystems

24.1 SOT — Sandals of Time (Retreats & Experiences)

Embodied soul infrastructure. Phase 2 retreat programs, experiential transformation, short/long-term stays. Revenue through booking fees and rental income. Maps to Membership Level 3 (Stay).

24.2 TRMIG — The Real Monopoly Investment Group

Asset & capital engine. Fractionalized real estate ownership with CMHC-backed leverage. Legal structure: TRMIG LP + GP Inc + Project HoldCo + Bare Trust + AssetCo. Entry as low as \$500 for micro-investors. Future tokenization layer for private marketplace.

24.3 TRM — The Real Monopoly (Realty)

Real estate brokerage and property management. Brand development, marketing, business process SOPs, competitor analysis. Property Management SOP v1 covers: tenant management, maintenance, bill payment, CMHC compliance, mortgage renewal, tax prep.

24.4 PBOC — Omega's Edge

Trading and investment division. Algorithmic trading (Omega's Edge), investment thesis, 2025 roadmap, founding partnerships. Maps to Membership Level 2b (Play).

24.5 TRMM — Education

K0RE education system across levels: elementary consciousness, high school transformation, development programs. Long-term vision for alternative education infrastructure.

26. Safety Design Architecture

25.1 Three-Tier Safety Framework

Tier	Name	Components
Tier 1	Kernel Safety	Ethics kernel (L0), capability permissions, non-harm enforcement
Tier 2	Operational Safety	Action receipts, kill switches, escalation thresholds, audit logging
Tier 3	Network Safety	Replication safeguards, Ethics Gate, Isolation Layer, Update Propagation

25.2 AI Safety Rules

- AI may recommend, analyze, and reflect — but never decide autonomously
- High-impact actions require multi-confirmation
- Reversibility is mandatory for all system actions
- No self-training without human review
- No recursive self-improvement

- No uncontrolled tool access
- Intelligence scales horizontally (more nodes), not vertically (more power)

25.3 Prohibited Actions (System-Wide)

- Autonomous action without human confirmation
- Social scoring
- User behavior manipulation
- Centralization of intelligence without opt-in
- Optimization for engagement metrics
- Surveillance of any kind

27. Document Synthesis Map

This master plan synthesizes content from 376 source documents across 21 folders. Key source mapping:

Section	Primary Sources	Document Count
Executive Summary	Folder 00 (Executive Summary), Aggregate Canons	24
Constitutional Framework	Folder 01 (Constitutional Framework), Aggregate Canon v1.0	22
K0RE Identity	K0RE-AI docs (Folder 15), Identity Merged PDF	6
First Principles	FPOP doc, First Principles Charter (Folder 15/6.0)	3
System Architecture	SRS, System Design Overview, System Blueprint (Folder 15/6.0)	8
K0RE-GPT Kernel	K0RE-GPT doc, CORPUS summary, Design Automation session	4
6 Life Domains	CLTRN 6.0 docs, Human Entity Implementation	5
Template Library	CLTRN 5.1 folder (40+ templates)	40+
Human Entity Flow	Human Entity Implementation, Consciousness Assessment	4
Agent Architecture	CLTRN 6.0 Agent Architecture doc	1
Database Schema	Network Database Schema doc (71KB)	1
Membership Model	Folder 07 (Membership)	12
TEV Framework	Folder 08 (TEV)	3
Tech Stack	Folder 12 (Infrastructure)	5
Competitive Moat	Competitor Threat & Sustainable Advantage doc	1
Revenue & Pricing Strategy	6 pillars, subscription tiers, Hormozi model	12
Hormozi Growth Engine	Grand Slam Offer, Value Ladder, Rule of 100, Retention Flywheel	8
Acquisition Funnel & Contact Strategy	SOT Marketing, Content Strategy, Paid Acquisition	15
Mobile App UX Architecture	SRS, CLTRN 5.1 templates, wireframes, FigJam flows	10
Website Architecture	Hormozi framework, conversion optimization, wireframes	8
Network Reward & Viral Growth	Referral Framework, K0RE CHI, Viral Mechanics	12
Execution Roadmap	Folder 14 (Execution Roadmap)	11
Team Requirements	Folder 13 (Resource Requirements)	7
Subsidiary Ecosystems	Folders 16-20 (SOT, TRMIG, TRM, PBOC, TRMM)	50+
Safety & Governance	AIOS Safety Design session, Constitutional Framework	8

Total source documents synthesized: 376 PDFs + 20 Google Docs + 3 Aggregate Canons

28. Immediate Next Steps

Starting today (February 14, 2026), 9 days to launch:

1. Cal approves this master plan as the build bible
2. Create Supabase CLTRN project + deploy MVP schema (22 tables)
3. Implement K0RE-GPT Kernel as AI system prompt

4. Initialize React Native + Expo mobile app project
5. Build Zero-Point Assessment (6 dimensions)
6. Build Daily Dashboard (TODAY equivalent)
7. Build K0RE Chat interface with 3-tier thought processing
8. Build Journal system (Gratitude, Dream, Benchmark)
9. Test group onboarding + launch (Feb 23)

This document is the single authoritative build reference. All prior versions are superseded.

Built for scale. Built from the complete K0RE bible. Let's go.
